STRYKER MX PRO R3 EMERGENCY TRANSPORT COT

The **Stryker MX PRO R3 Emergency Transport Cot** is a lightweight, highly durable patient transport solution designed for demanding emergency situations. Weighing just 81 pounds, it supports up to 650 pounds, making it one of the most versatile and maneuverable cots on the market—especially when the breakaway head section is folded, reducing its length for tight spaces. Built with rugged, lightweight aluminum featuring a high-visibility powder coating, it offers seven adjustable height positions, easy positive height adjustments, and a pneumatic backrest with infinite positioning. Its thoughtful design includes a one-hand release breakaway head, fold-down siderails, and safety features like a shock-absorbing frame, floor-mounted safety hook, and oversized wheels with sealed bearings for smooth maneuverability. With color-coded controls, a perforated litter surface, sealed bolster mattress, and patient restraints—including two lap belts and a four-point shoulder harness—this cot ensures safety, reliability, and ease of use in critical moments.

MEDFUSION 3500 V 3.0.6 SYRINGE PUMP

The **Medfusion 3500 Syringe Pump with Version 3.0.6 Software** is a versatile, advanced infusion device suitable for use across various hospital departments and physician practices. This refurbished "smart pump" features automatic detection of multiple syringe types from seven different manufacturers, ensuring enhanced safety and precise drug delivery. Designed for ergonomic single-hand loading and easy mounting on IV poles or bassinets, it utilizes FlowSentry technology to promote patient safety and medication accuracy. Capable of infusing at flow rates from 0.01 mL/hr up to 1130 mL/hr, it supports low-flow infusions with larger syringes and is MRI compatible. Sold refurbished with a 6-month warranty, the Medfusion 3500 offers reliable, accurate, and flexible syringe infusion management

GE MAC 5500 HD ECG

The **GE MAC 5500 HD Resting ECG System** is a high-end ECG system designed for speed, accuracy, and comprehensive disease management. Built upon GE's legacy of ECG innovation, the MAC 5500 HD offers advanced algorithms and networking capabilities, making it a powerful tool for clinicians. Key features include improved triaging for Acute Coronary Syndrome (ACS) detection, configurable critical values to accelerate treatment, and enhanced pacemaker detection for accurate interpretation of paced rhythms. The system also streamlines workflow with barcode capabilities for order and ADT downloads, aiming to boost efficiency across healthcare enterprises. Ultimately, the MAC 5500 HD facilitates connected ECG workflows, helping to save time, reduce misdiagnoses, and minimize errors in patient data and billing, allowing clinicians to focus on delivering optimal patient care.

VALLEYLAB FORCE FX

The **Valleylab Force FX™** generator offers surgeons precise power delivery, even through resistant tissue, thanks to its innovative Instant Response™ technology. This technology optimizes performance at lower power settings, reducing the risk of tissue damage, neuromuscular stimulation, and the need for higher power settings. The generator automatically adjusts to tissue changes, maintaining power delivery and minimizing drag, while also reducing capacitive coupling by 30-50%. Featuring three internal microcontrollers for rapid response and increased processing speed, the Force FX™ offers versatile functionality with three cut modes, four coag modes, and three bipolar modes. Its compatibility with the Computer Motion Hermes™ Voice Command System and lightweight design (under 18 lbs) make it a valuable and adaptable tool for any operating room.

ALLEN YELLOFIN LIFT-ASSIST STIRRUPS (OEM# O-YFASI)

The **Allen Yellofin Lift-Assist Stirrups** (Hill-Rom/Allen OEM#: O-YFASI) are designed to enhance patient safety and ease of use during a variety of surgical procedures, including GYN, urological, laparoscopic, robotic, and colorectal procedures. These stirrups utilize patented Lift-Assist™ technology to neutralize the weight of the patient's leg, allowing for effortless positioning and reducing the risk of back injuries for surgical staff. The unique lateral safety fin minimizes the risk of peroneal nerve injuries, a common concern with traditional stirrups. Additional features include a floating boot for calf pressure reduction, a squeeze grip handle for sterile intraoperative adjustments, lithotomy and length indicators for precise positioning, a dual-bar design to prevent medial leg drop, and easy-to-clean welded pads with removable silicone straps for infection control. With a patient weight capacity of up to 350 lbs and compatibility with any OR table and conventional electrosurgical instruments, the Allen Yellofin Lift-Assist Stirrups are a reliable choice for healthcare facilities.

PHILIPS HEARTSTART FRX AED W/ WALL MOUNT BOX

The **Philips HeartStart FRx AED** is a state-of-the-art defibrillator, notable for its durability and user-friendly design. Backed by a 1-year manufacturer's warranty, this model uniquely offers an optional infant/child key, enabling the use of adult pads on pediatric patients. Lightweight and rugged, the FRx is designed to be both portable and resilient. This package includes the FRx Biphasic unit, a new long-life lithium battery, Smart Pads II electrodes, a user's manual, and a convenient carry case. Also included are biocertification and a physician's prescription, as required by the FDA. **A wall mount box is provided for easy and accessible storage**.

MEDFUSION 3500 V6 SYRINGE PUMP

The **Medfusion 3500 V6 Syringe Pump**, enhanced by PharmGuard Medication Safety Software, offers an intuitive and safe medication delivery system. Its large screen displays up to 30 characters per drug name, minimizing abbreviation errors, and the bright LCD backlight ensures clear visibility in any lighting. The pump's extensive configurability allows for customizable clinical alerts, promoting best practices. Features include programmable weight, volume, and occlusion limits; support for loading and bolus dose therapies; adjustable alarm settings; and FlowSentry rapid occlusion detection for continuous pressure monitoring. The horizontal syringe plunger simplifies loading and unloading, protecting the barrel. A 10-hour battery life ensures reliable operation. The Medfusion 3500 V6 combines advanced features with ease of use to improve medication safety and efficiency.

MIDMARK RITTER M9 ULTRACLAVE (AUTOCLAVE), M9 ULTRACLAVE

The **Midmark Ritter M9 UltraClave** is a user-friendly automatic sterilizer designed for simple and reliable operation. Its automated features streamline the sterilization process: simply load the instruments, select the desired cycle, and press start. The M9 automatically fills with the correct water level and, upon cycle completion, automatically opens the door for efficient steam dissipation and faster drying times. Built-in safety features, including overheat protection, a pressure relief valve, and an error light, ensure safe and reliable performance. Self-program controls allow customization of cycle parameters to accommodate specific instrument processing needs, while pre-programmed cycles offer convenience for routine sterilization. The green LCD display provides clear visibility of cycle indicators. The M9 is commonly used in various healthcare settings such as dental clinics, medical offices, veterinary practices, and other outpatient facilities where efficient and reliable sterilization of instruments is critical. Its ease of use and compact design make it well-suited for smaller practices and labs. Industries beyond

healthcare, such as tattoo parlors and beauty salons, may also utilize the M9 for sterilizing tools and equipment.

STRYKER CAST SAW WITH VACUUM

The reconditioned **Stryker 940 Cast Cutter and 986 Cast Cutter Vacuum combo** (Stryker Cast Saw and Vacuum) offers a reliable and efficient solution for cast removal procedures. The Stryker 940 Cast Saw features dual-speed cutting, a compact design for enhanced maneuverability, and three interchangeable blades to handle various cast types, all with compatibility for independent operation or integration with the 986 Vacuum. The Stryker 986 Vacuum complements the saw with high suction power, a wheeled stand for easy mobility, and quick, straightforward filter replacement to maintain hygiene and performance. Backed by a 6-month warranty, this system provides healthcare providers with a durable, user-friendly, and hygienic approach to cast removal.

VERATHON GLIDESCOPE MONITOR WITH BATON

The **Verathon GlideScope Monitor** (Model: 0570-0338) **with Baton** (Model: 0570-0307) is a portable video laryngoscopy system designed to provide a consistently clear, real-time view of the airway, enhancing first-pass intubation success and patient safety. The system features a high-resolution 6.4-inch color monitor, image and video recording capabilities for training and documentation, and single-use video batons to eliminate cross-contamination. Weighing just 2.2 lbs (1 kg), the durable monitor is easy to transport and maneuver, making it suitable for a variety of settings, including routine intubations, difficult airway management, emergency situations, operating rooms, ICUs, and emergency departments. Its versatile blade options, user-friendly interface, anti-fogging feature, and battery-powered operation make it an invaluable tool for clinicians managing diverse patient populations, including pediatric cases, and for anesthesia training purposes. The monitor's dimensions are 6.85" x 8.78" x 3.15" (174 mm x 223 mm x 80 mm) and it operates within a temperature range of 50°-104° F (10°-40°C).

PHYSIO-CONTROL LIFEPAK 20E DEFIBRILLATOR

The **Physio-Control LIFEPAK 20e defibrillator/monitor** is designed for in-hospital first responders, offering an intuitive interface with sophisticated features crucial for saving lives during cardiac arrest. It utilizes Physio-Control ADAPTIV™ biphasic technology, delivering energy settings up to 360 joules for difficult-to-defibrillate patients, which has proven effective in terminating shockable heart rhythms in patients requiring multiple shocks. The device adapts to various patient environments and is easy to use, even for those infrequently trained in AED operation. Advanced monitoring parameters, such as ECG, external pacing, and pulse oximetry, are clearly displayed through color-matched waveforms and values. The LIFEPAK 20e performs automated daily self-tests and features a battery gauge to ensure readiness. It includes a hospital-grade power cord, 3-lead ECG cable, Quik Combo cable, SpO2 adult reusable finger sensor, test plug, new battery, and a set of adult pads. **It is biocertified and comes with a 1-year warranty**. The device offers two display options, seven main operating modes, and can print a CODE SUMMARY™ report and transfer data records via IrDA version 1.0.

WELCH ALLYN SPOT VITAL SIGNS LXI MONITOR

The **Welch Allyn Spot Vital Signs LXi Monitor** is a versatile device designed for efficient and accurate vital signs measurement. Equipped with SureBP™ technology, it measures blood pressure in approximately 15 seconds during cuff inflation, enhancing patient comfort and saving time. In addition to blood pressure (including pulse rate and MAP), the monitor features a Braun ThermoScan PRO 4000 Ear Thermometer for temperature readings and allows manual entry of weight, height, respiration rate, and pain level, calculating Body Mass Index (BMI). It stores up to 50 readings for later review, printing, or downloading and is connectivity-ready for seamless data transfer. The monitor's user-friendly design includes a large, bright LCD display for clear visibility and error messages that provide descriptive solutions rather than just codes. Overall, the Spot Vital Signs LXi is a fast, accurate, flexible, and easy-to-use solution for comprehensive vital signs monitoring.

WELCH ALLYN SSM VITAL SIGNS MONITOR

The **Welch Allyn SSM 300 Series Vital Sign Monitor** is a versatile and reliable device designed to meet the diverse needs of healthcare providers. Equipped with features such as noninvasive blood pressure (NIBP) measurement, pulse rate monitoring, and mean arterial pressure (MAP) calculation, this monitor ensures precise and comprehensive vital sign assessment. It also incorporates SureTemp® Plus Thermometry and Nellcor pulse oximetry to deliver accurate temperature readings and oxygen saturation levels. Catering to adult, pediatric, and neonatal patients, the device is adaptable across various clinical settings. Its user-friendly design is highlighted by an LCD display that simplifies menu navigation, making it easy for healthcare professionals to operate. Additional features include an automatic blood pressure mode, programmable alarms for patient safety, built-in memory for data storage, and intuitive icons that enhance usability. Lightweight and portable, the SSM 300 Series offers a range of mounting options, ensuring it can be conveniently integrated into any healthcare environment.

PEDIGO 5400 W STRETCHER, SIDE BRAKE ONLY

The **Pedigo 5400 W Stretcher** with a side brake system exemplifies a perfect blend of functionality and cost-efficiency, making it an ideal choice for various medical settings including the Emergency Department (ED), Operating Room (OR), and Post-Anesthesia Care Unit (PACU). This stretcher is equipped with robust, full-length side rails that feature a single release for quick accessibility, and a center column support that utilizes a single hydraulic lift cylinder and precision ball bearings for smooth and effortless height adjustments. The integration of dual side-mounted hydraulic foot pedals enhances user control over the stretcher's positioning, while the pneumatic assist Fowler backrest aids in safely adjusting patient posture. Notably, the stretcher includes a unique True Direction Steering (TDS) system that improves maneuverability and directional stability. Additionally, the stretcher is designed with patient comfort and safety in mind, offering multiple IV pole receptacles, restraint strap positions, and high impact composite corner bumpers. With a robust weight capacity of 500 lbs and large, easy mobility casters, the Pedigo 5400 W Stretcher ensures reliable and secure patient transport within

healthcare facilities.

MIDMARK 623 EXAM TABLE

The **Midmark 623 Barrier-Free Examination Table** allows patients incapable of getting onto an exam table (whether it be the elderly, or young children) to easily get on, increasing the patient's comfort and satisfaction with the patient experience. To meet the needs of America's disabled patients, as well as the physicians who care for them, the Midmark 623 barrier-free exam tables decrease the chance of injury, helping maintain the patient's dignity and reducing their anxiety. This will help increase exam room efficiency, comfort, and safety.

STERIS LED385 EXAM LIGHT ON FLOOR STAND

The **Steris LED385 Exam Light on a Floor Stand** is a highly efficient medical examination light designed to provide exceptional visibility and color accuracy for healthcare professionals. With a light intensity that reaches up to 50,000 Lux, it ensures that examination areas are well-illuminated. Its 6-inch fixed spot pattern size is ideal for focused assessments, allowing precise illumination without the need to frequently adjust the light's position. The LED385 also boasts a color temperature of 5000° K, simulating natural daylight to aid in accurate color discernment of tissues and surfaces. Its impressive Color Rendering Index (CRI) of 90 further enhances the ability to accurately recognize color nuances, which is crucial during medical examinations. Additionally, the light maintains a low heat-to-light ratio of 3.4 mW/m2-lx, minimizing patient discomfort from heat exposure. Durability is also a key feature, with an average LED bulb life of 30,000 hours, making it a reliable choice for busy clinical environments. This combination of features makes the Steris LED385 Exam Light on Floor Stand an optimal solution for medical settings requiring high-quality, focused lighting.

STERIS CAVIWAVE PRO SINGLE CHAMBER 17 GAL ULTRASONIC CLEANER

The **Steris Caviwave Pro Single Chamber 17 GAL Ultrasonic Cleaner** is a state-of-the-art cleaning solution designed for the meticulous care of delicate instruments. With a remarkable cleaning frequency of 132kHz, it significantly surpasses the standard 40kHz used by most ultrasonic cleaners, ensuring a deeper and more thorough clean. It boasts a robust sonic power of 2000 watts, making it ideal for handling heavy-duty cleaning tasks. The convenience of a toe touch cycle start, coupled with automatic chemistry injection, streamlines the cleaning process, reducing manual intervention. Depending on the unit configuration, the cleaner can automatically clean, flush, lubricate, and dry instruments, making it a versatile addition to any facility. Flush ports are strategically incorporated to allow the tank solution to penetrate internal passages effectively. **The 17-gallon tank can accommodate up to 35 pounds of instruments, including specialized trays like the Da Vinci Xi instrument Tray CRP1723 and Da Vinci® Single Site® and Endowrist® Instruments (CRP1717)**. The unit's electrical specifications cater to various setups, supporting both single and three-phase connections. Efficient drainage is ensured through gravity and pump systems, with maximum flow rates of 10 and 20 gpm, respectively, accommodating water temperatures up to 120°F. The cleaner's design, with dimensions of 43-1/2 x 42-1/4 ± 1 x 36 inches, requires a minimum service access clearance of 24 inches on all sides, emphasizing the need for ample space for optimal operation and maintenance.

TUTTNAUER ELARA 11 AUTOCLAVE

With over 80 years of expertise in sterilization and infection control, Tuttnauer has always provided reliable and advanced technology. The Elara 11, Tuttnauer's latest addition to the pre & post vacuum autoclave family, continues this tradition. It is an ideal sterilization solution for any dental, outpatient or private clinic which needs the highest sterilization standards.

The Elara 11 is designed for sterilization of wrapped, porous and hollow loads. The chamber volume is large, external dimensions are small, making it especially suitable for smaller clinics requiring a high turnover. The control system is smart and intuitive, easy to use and has a large memory for consistent and reliable performance.

VALLEYLAB FORCE FX-C

The **Valleylab Force FX-C** is a full-power electrosurgical generator equipped with Instant Response™ Technology, designed to provide surgeons with lower power settings that minimize the risk of tissue damage and neuromuscular stimulation. This generator automatically adapts to tissue changes, maintaining consistent power delivery and reducing drag. It offers versatile functionality with three cut modes, four coagulation modes, and three bipolar modes. Notably, the Valleylab Force FX-C can be used in conjunction with the Valleylab CUSA System 200 and CUSA EXcel for ultrasonic electrosurgery, automatically limiting monopolar output power when a CUSA handpiece with CEM nosecone is connected. **The system includes a monopolar foot pedal**, with optional bipolar foot pedal and universal cart accessories available for enhanced functionality.

MEDFUSION 3500 SYRINGE PUMP WITH VERSION 5 SOFTWARE

The **Medfusion 3500 Syringe Pump** is a cutting-edge device designed to meet the needs of various departments within hospitals and medical practices. This refurbished pump features intuitive syringe detection capabilities, enhancing safety and accuracy in drug administration. Known as a "smart pump," it accommodates syringes from seven different manufacturers, ensuring versatility for healthcare providers. Its ergonomic design allows for single-hand loading, making it easy to operate, while its mounting options enable secure placement on IV poles or bassinets. Additionally, the Medfusion 3500 employs **FlowSentry technology**, which further safeguards patient safety and ensures precise drug delivery. With an accuracy of +/- 2% and compatibility with MRI settings, this advanced syringe pump is an essential tool for improving medication administration in any clinical setting. The inclusion of Version 5 Software enhances its functionality, providing healthcare professionals with a reliable and efficient solution for intravenous therapy.

STERIS VLED SINGLE HEAD CEILING MOUNTED SURGICAL LIGHT

The **Steris Harmony vLED Surgical Lighting System** stands out as a highly versatile and technologically advanced solution for various medical environments. Designed to cater to a broad range of surgical and diagnostic needs, this modular and configurable system offers unparalleled illumination quality, essential for precision in procedures. With a maximum central illuminance of 160,000 lux and an adjustable pattern size, it ensures optimal visibility in both small outpatient surgery centers and large acute care suites. The system's color temperature of 4400K and an impressive Color Rendering Index (CRI) of 96 enable medical professionals to discern subtle variations in tissue color and texture, critical during intricate surgeries. Moreover, its low heat-to-light ratio minimizes the thermal discomfort often experienced in intensely lit settings, enhancing the comfort of both the surgical team and the patient. With a long lifespan of 30,000 hours, the Harmony vLED system is not only effective but also an economical lighting solution for operating rooms, emergency departments, and intensive care units.

STRYKER M SERIES (1005/1007) STRETCHER

The Stryker M Series (1005/1007) Stretcher is a versatile and high-quality stretcher that offers various features for optimal patient comfort and convenience.

It has a thermoformed ABS base with an extra capacity storage tray, allowing for easy organization of medical equipment and supplies. With a weight capacity of 700 lbs, it can accommodate a wide range of patients. The patient surface is available in either 26" or 30" (66 cm) width and is equipped with a 3" (8 cm) 4" Enhanced Comfort Mattress, ensuring optimal comfort during transport. The stretcher also features an integrated utility tray and a litter-mounted oxygen bottle holder for easy access to essential equipment. Additionally, the Power-washable design makes cleaning and maintenance hassle-free. The stretcher is equipped with a four-wheel, steel-ring brake system with dual-end activators for added safety. The dual side-mounted foot control hydraulics with a uni-lower pedal allow for easy height adjustments. The GlideawayTM siderails with integrated push/pull handles provide ease of use and maneuverability. The stretcher also features four integrated IV receptacles for convenient access to fluids. Trend./reverse Trend. ±16° functionality, along with a pneumatic backrest and stationary footrest, ensure patient positioning options. The constant descent hydraulics provide precise control during use. The stretcher also offers dual-end brake and steer controls for effortless navigation. Furthermore, the extra 5th wheel ensures additional steering capability, making it easier to maneuver in tight spaces. Overall, the Stryker M Series (1005/1007) Stretcher offers a wide range of features and functionalities to meet the needs of healthcare professionals and provide optimal comfort and care for patients.
