- **BackSaver Fowler™ mechanism** provides for easier articulation of the head section*
- **Auto Contour™ feature** helps prevent patients from slipping down the mattress* (includes BackSaver Fowler mechanism)
- **Active hand brake** reduces physical exertion required when going down ramps, around corners and stopping*
- **Integrated dual display scale** (lbs/kgs simultaneously) memorizes last weight*
- **Ergonomic push handles***
- **Integrated IV pole transport holder** helps to maneuver stretcher and a portable IV pole with ease*
- **Integrated O₂ holder and tray***
- **Next generation Steering Plus™ system**
- **Redundant-locking, four-wheel brakes**
- **Power washable**
- **Three year parts warranty** and life-time frame weld warranty

* Optional feature

Hill-Rom Procedural Stretcher

Hill-Rom's rugged procedural stretcher (P8000) is the ideal choice for Emergency, OR, PACU or ASC settings. This stretcher offers unsurpassed mobility, comfort and quality.

Mobility. Hill-Rom's innovative Steering Plus™ system allows crisp cornering and control. In addition, the system self adjusts when passing over uneven floor surfaces, preventing vibrations from reaching the patient, as experienced with larger, fixed-wheel systems.

Comfort. Reduce patient handling risks and enhance patient comfort. The BackSaver Fowler® feature provides the caregiver with easier head section articulation. Patients remaining on stretchers for extended periods of time due to overcrowding are at risk for developing pressure ulcers. Our innovative, five-inch air mattress—AccuMax Quantum™ Stretcher Pad—is the only non-powered, dynamic pressure redistribution stretcher mattress with Controlled Release™ Technology.

Quality. Our reinforced frames are made of heavy-gauge, automotive-grade steel for long-lasting quality. Hill-Rom is committed to helping caregivers manage an increasingly obese population. Focused on patient and caregiver safety, all Hill-Rom stretchers are designed and tested to safely support a weight of 700 lbs.
