

2 Tray Dri-Clave Dry Heat Sterilizer- Fully Refurbished

The FDA approved technique of dry heat sterilization works without pressure, steam, or chemicals. Dry heat sterilizes in the shortest possible time and you never need to dry the instruments. Ideal for all medical and dental instruments, it sterilizes instruments, needles, syringes, glassware, etc. at 320 °F (160 °C). Sharp instruments remain sharp; no steam or moisture to corrode the finest edge. The operate on 115V AC and are UL Listed and FDA Registered. The best method for sharp, micro, delicate instruments: Dry heat sterilizer kills bacteria without moisture and will not rust or dull sharp or serrated instruments.

Features:

- Maintenance-Free
- Require no routine cleaning.
- Safe and simple to operate
- Dry heat sterilization works without pressure, steam or chemicals, which increases safety and makes operating simple.
- Convenient
- Unit has automatic timers with heat "hold" capability for continuous use in a busy practice.

Why purchase Auxo Medical Reconditioned Biomedical Equipment?

Auxo thoroughly inspects and re-certifies all of its reconditioned biomedical equipment. Batteries are checked or replaced, and each unit is cosmetically repaired. Calibrations are made and all safety inspections will be completed. In most cases our equipment warranties meets or exceeds those of the OEM.
