ANESTHESIA/EQUIPMENT BOOMS

Auxo Medical provides anesthesia/equipment booms that are flexible. They conform to various configurations depending on the space requirements, function and purpose. In fact, anesthesia/equipment booms reduce clutter caused by the cords they eliminate the risk of tripping hazards. Ultimately, this prevents hazards, thereby improving staff and patient safety. Anesthesia/Equipment Booms are also a great option for surgical lighting systems, making them an efficient and ideal solution for any facility.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

REFURBISHED

MEDISPACE PENDANT SYSTEM SINGLE RETRACTABLE

The height-adjustable MediSpace, a ceiling-mounted spring arm system with integrated media connections, reliably and cost-effectively supplies floor-based machines such as anesthesia machines, heart-lung machines or endoscopic equipment trolleys with medical gases, electricity and data. Thanks to the integrated compensating spring, the MediSpace can be precisely positioned in space with one hand and easily brought to an ergonomic working height. In this way, the connection between the medical devices and the MediSpace can be easily established in the lower position. Thanks to the generous travel, the system can be mounted close to the ceiling and, thanks to the space-saving parking position, gives the OR team more freedom of movement compared to conventional anesthesia ceiling supply units.

VALIA X EQUIPMENT ARM WITH M20 PENDANT SYSTEM SPRING ARM SYSTEM

VALiA X is a slim support arm system for loads of up to 110 kg for the height-adjustable version with spring arm and up to 140 kg for the non-height-adjustable extension arm version. The combination of the slim design with the high load capacity of the spring arm makes VALiA X the ideal support arm system for large screens in diagnostic rooms. Thanks to its slim design, VALiA X, combined with a supply console, also offers a space-saving solution for intensive care units.

MEDIBOOM PENDANT SYSTEM TANDEM MOUNTED FIXTURE

The Mediboom has the most versatile array of features in the industry. The combination of duplex outlets and provision for gases combined with the ease with which it can be moved, the Mediboom Equipment Management System is capable of supporting your full range of equipment in today's operating room. The use of tapered roller bearings and a healthy throat size on the suspension arms allow the Mediboom to accommodate a full complement of services without compromising mobility. Service capacity and smooth, easy-to-move arms with rock solid brakes have become trade marks of the Mediboom Equipment Management System.
