STERIDATA LOGGER PAPERLESS STERILIZER CYCLE PRINTER FOR STATIM

SteriData™ Logger for SciCan Statim 2000 and 5000 cassette sterilizers* (must have must have serial port in back and current software)

The paperless alternative to a paper Printer

This SteriData Logger unit plugs in just like the paper printer and sits on top of your Sterilizer. Now all your sterilizer cycle data is saved to the SD card (included) automatically.

When the cycle data is required, simply take the SD card to your computer where all the cycle files are arranged by year and month, date and time.

The individual sterilizer cycle files are recorded as text files and easily displayed and/or printed out from your computer as required. Optionally, you can include your practice name and the sterilizer serial number which will be added to every cycle file.

TUTTNAUER T-TOP 10B CLASS B PRE/POST VAC AUTOCLAVE

The **Tuttnauer T-TOP 10B Class B Pre/Post Vac Autoclave** is a compact, highly efficient sterilization solution designed for ease of operation and advanced connectivity. Featuring a 10" W x 18" D chamber with a 21L capacity, it accommodates up to five trays and offers sterilization times ranging from 24 to 73 minutes depending on the cycle, with drying included. Its user-friendly interface, equipped with a multicolor LCD touchscreen, simplifies setup and daily operation, while programmable cycle scheduling saves time. The autoclave's advanced technology includes internal memory capable of storing up to 500 cycles, remote access via Wi-Fi and T-Connect cloud software for cycle monitoring, notifications, and paperless documentation—all supporting streamlined workflow and enhanced safety. Designed for reliable performance, it features steam flush pressure pulse (SFPP) technology without liquids, and offers options for software updates to ensure ongoing efficiency. Its sturdy design and manual water filling make it suitable for a variety of healthcare and sterilization centers seeking dependable, connected sterilization.

TUTTNAUER T-TOP 11B SFPP AUTOCLAVE

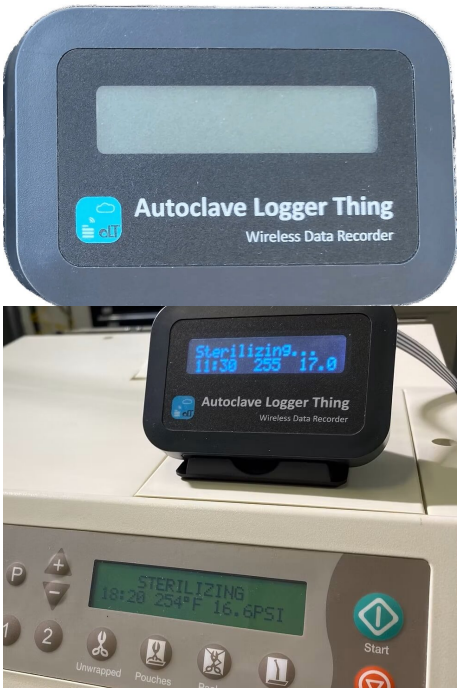

The **Tuttnauer T-TOP 11B SFPP Autoclave** offers advanced, reliable sterilization with user-friendly features designed to enhance efficiency in healthcare settings. This Class B pre/post vacuum autoclave utilizes steam flush pressure pulse (SFPP) technology, ensuring thorough sterilization without liquids, with programs optimized for unwrapped, wrapped, and delicate instruments—ranging from 38 to 80 minutes at various temperatures. Its 27-liter chamber (11" W x 18" D) accommodates multiple trays, and it is easily operated via a multilingual LCD touchscreen featuring intuitive icons. The autoclave is equipped with internal memory capable of storing up to 500 cycles, programmable start times, and advanced connectivity options including two USB ports, Ethernet, Wi-Fi, and T-Connect cloud-based IoT software—allowing remote access to cycle history, notifications, and real-time monitoring. Designed for modern sterilization centers, it features a paperless documentation system, advanced programming options, and a specially designed user interface to streamline daily workflow, making it a robust, efficient solution for ensuring sterilization compliance and safety.

ALTERNATIVE DATA LOGGER TO MIDMARK 9A682001 FOR M9/M11-040 THROUGH -042

The **Autoclave Data Logger M42** is an alternative to the Midmark 9A682001 for third-generation Midmark M9 and M11 sterilizers with LCD displays and gray-white covers, specifically models ending with -040 through -042. Measuring approximately 2-1/2" x 4" x 1", this wireless device includes a removable 16GB micro SD card, SD card adapter, stand, cable, user/setup manual, and a drill template for installation under the printer cover plate. It features a secure Wi-Fi connection, FCC certification, and an LCD display. The M42 automatically logs sterilization cycle data, maintains accurate time with daylight savings adjustments, and uploads logs seamlessly to a secure offsite Dropbox cloud backup. With a five-year battery life (CR1220) and unique device naming, it provides a reliable, offsite data management solution tailored for third-generation Midmark autoclaves.

TUTTNAUER T-TOP 11S SFPP AUTOCLAVE

The **Tuttnauer T-TOP 11S SFPP Autoclave**—a compact, high-performance sterilizer designed to simplify and accelerate your daily workflow. Its user-friendly LCD color touchscreen and intuitive icons make programming and monitoring effortless, while a multistage steam flush (SFPP) ensures fast, liquid-free sterilization. With internal memory for up to 500 cycles, remote access to cycle history via Wi-Fi and T-Connect software, and cloud-based paperless documentation, you can manage, customize, and optimize operations from anywhere. The device supports time-saving scheduling, delivers precise cycle options for wrapped and unwrapped loads, delicate instruments, and small quick-turnaround runs, and provides secure cloud connectivity for alerts and notifications. Built for reliability, the 11L chamber (27L total volume) features 5 trays and a compact footprint (23" D x 19.5" W x 17.5" H) with easy water filling and dual USB ports, making it an ideal sterilization centerpiece for busy offices or clinics seeking streamlined, connected, and compliant sterilization.

SCICAN STATIM 5000 G4 CASSETTE AUTOCLAVE (NEW)

The SciCan Statim 5000 G4 Cassette Autoclave delivers a fully automatic and exceptionally fast sterilization solution for today's demanding practices. This brand-new unit utilizes four single-touch programs to optimize instrument cleaning from start to finish. Boasting a larger cassette and an additional sterilization cycle, the Statim 5000 G4 efficiently processes even larger instruments with remarkable speed and reliability, completing a wrapped cycle in just 17.5 minutes and an unwrapped cycle in a mere 9 minutes. The modernized design features a user-friendly 3.5" color touchscreen with intuitive controls, and a built-in data logger that eliminates the need for traditional thermal paper and cumbersome external devices by saving cycle data to a USB drive or the cloud. Equipped with features like ultra-fast cycles, Dri-Tec Drying Technology, and aseptic transfer capabilities, the Statim 5000 G4 ensures exceptional instrument turnover, prolongs instrument life, and reduces instrument investment, making it an invaluable addition to any practice.

MIDMARK RITTER M9 ULTRACLAVE (AUTOCLAVE), M9 ULTRACLAVE

The **Midmark Ritter M9 UltraClave** is a user-friendly automatic sterilizer designed for simple and reliable operation. Its automated features streamline the sterilization process: simply load the instruments, select the desired cycle, and press start. The M9 automatically fills with the correct water level and, upon cycle completion, automatically opens the door for efficient steam dissipation and faster drying times. Built-in safety features, including overheat protection, a pressure relief valve, and an error light, ensure safe and reliable performance. Self-program controls allow customization of cycle parameters to accommodate specific instrument processing needs, while pre-programmed cycles offer convenience for routine sterilization. The green LCD display provides clear visibility of cycle indicators. The M9 is commonly used in various healthcare settings such as dental clinics, medical offices, veterinary practices, and other outpatient facilities where efficient and reliable sterilization of instruments is critical. Its ease of use and compact design make it well-suited for smaller practices and labs. Industries beyond healthcare, such as tattoo parlors and beauty salons, may also utilize the M9 for sterilizing tools and equipment.

MIDMARK RITTER M11 ULTRACLAVE VETERINARY AUTOCLAVE, M11-033

The **Midmark Ritter M11 UltraClave Veterinary Autoclave**, including the refurbished model with an 11" x 18" chamber, is renowned for its remarkable sterilizing capacity, making it an ideal choice for veterinary practices that handle larger packs and instruments. This countertop sterilizer boasts an exclusive automatic-opening door, which not only enhances ease of use but also facilitates a quick drying time, ensuring efficiency in every cycle. Its Steam–Flush Pressure Pulse Air Removal System guarantees proper steam penetration, thereby optimizing sterilization effectiveness. Users can take advantage of the Self Program Controls to tailor cycle parameters for specific instrument processing needs, while the Pre-Programmed Controls offer added convenience for routine tasks. The green LCD display provides a clear view of operational indicators, enhancing user interaction. With external dimensions of 17.8" wide by 23.8" deep by 17.8" high, the unit accommodates two trays measuring 9" x 15" and two trays measuring 6.6" x 15". Weighing 90 pounds, the M11 delivers efficient sterilization with a cycle time of approximately 30 minutes, solidifying its position as a leading choice in veterinary sterilization equipment.

MIDMARK M9D MANUAL DOOR DENTAL AUTOCLAVE

The **Midmark M9D Manual Door Dental Autoclave (Refurbished)** is a reliable and efficient solution for dental instrument sterilization. Designed to ensure precision and safety, this autoclave features an intuitive start button that automatically fills the chamber with the correct amount of water, streamlining the sterilization process. It includes a manual door that can be opened to release steam, allowing for the fastest drying times and enhancing workflow efficiency. Built with safety in mind, it boasts critical features such as overheat protection, a pressure relief valve, and a flashing "Error" light to alert users of any issues. The self-program controls offer versatility by enabling users to customize cycle parameters to meet specific sterilization needs, while the green LCD display ensures easy monitoring of the autoclave's status. With overall dimensions of 20.13"D x 15.3"W x 15.8"H and a chamber capacity of 3.5 gallons, it accommodates a range of instruments. Weighing 70 lbs and requiring a 115V power supply, the M9D is both robust and user-friendly, making it an ideal choice for dental practices focused on reliability and performance.

TUTTNUAER 2540EK KWIKLAVE ELECTRONIC AUTOCLAVE (REFURBISHED)

The **Tuttnauer 2540EK Kwiklave Electronic Autoclave**, available in a refurbished model, is a versatile and efficient sterilization device ideal for various medical and laboratory settings. It offers four distinct programs—Unwrapped, Wrapped, Liquids, and a Drying cycle—facilitating comprehensive sterilization processes. Its intuitive one-touch operation allows electronics to manage the entire cycle seamlessly from start to finish, ensuring ease of use and reliability. The autoclave features a spacious 22-gallon chamber volume and a closed-door drying cycle, maintaining the sterility of instruments post-sterilization. Designed with user convenience in mind, it includes an automatic shut-off, audible and visual alerts for cycle interruptions, and a user-friendly keypad. For added utility, an optional printer is available for documenting sterilization cycles. All Tuttnauer autoclaves are A.S.M.E. stamped and U.L. approved, guaranteeing high standards of safety and performance. The autoclave has a chamber size of 10 inches in diameter and 19 inches in depth, accommodating four trays with each tray measuring 16.3 inches by 6.7 inches. Operating on 220-230V, this steam autoclave (Class S) is compact yet robust, with overall dimensions of 21.5 inches in depth, 20 inches in

width, and 14.4 inches in height, and has a right-side hinged door swing.

STERI-DENT 200 DRY HEAT STERILIZER

The **Steri-Dent 200 Dry Heat Sterilizer** stands out as an exceptional method for sterilizing sharp instruments, effectively killing bacteria without moisture and preserving the sharpness of the tools. This versatile equipment not only serves as an efficient sterilizer but also functions as a drying unit for wet packs or as a reliable backup to an autoclave in a busy practice. One of its most appealing features is that it is maintenance-free, eliminating the need for routine cleaning that wet heat methods require. Safety is significantly enhanced as dry heat sterilization operates without the need for pressure, steam, or chemicals. The Steri-Dent 200 is equipped with a rapid-start heating element for quick operation, making it both safe and simple to use. Convenience is further underscored by utility trays that can be sterilized with lids on, ensuring they remain uncontaminated in storage. Automatic timers with a heat "hold" capability make it an ideal choice for continuous use. Constructed from high-quality stainless steel, the Steri-Dent 200 is built to last, resisting rust and ensuring long-term durability. Beyond its technical advantages, it is also value-priced, offering low purchase and operating costs, and eliminating the need for distilled water. The Steri-Dent 200 Dry Heat Sterilizer combines efficiency, safety, and economy, making it an indispensable tool for any medical practice.

TUTTNAUER T-TOP 10S GRAVITY AUTOCLAVE

The **Tuttnauer T-TOP 10S Gravity Autoclave** represents a significant advancement in sterilization technology, specifically designed for small clinics, laboratories, and other healthcare facilities. This model, known for its robust reliability and user-friendly interface, utilizes gravity displacement technology to effectively remove air and sterilize equipment using steam under pressure. It's compact design makes it ideal for environments where space is at a premium, yet it does not compromise on the capacity or the quality of sterilization. The T-TOP 10S also features a range of safety and efficiency protocols, including a heat-insulated double-locking door mechanism and an intuitive control panel that simplifies the sterilization process. This autoclave is an excellent choice for medical professionals seeking a cost-effective, efficient solution for ensuring the sterility of their instruments and supplies.

TUTTNAUER LABSCI 85LV VERTICAL AUTOCLAVE

The **Tuttnauer LabSci 85LV Vertical Lab Autoclave** is a state-of-the-art steam sterilizer designed to meet the demanding needs of educational institutions and research facilities. With a generous 85-liter chamber volume, this top-loading autoclave maximizes the efficiency of sterilization processes by accommodating large and varied loads, including up to four 2000 mL Schott-Duran flasks or three 2000 mL Erlenmeyer flasks. It is equipped with four validated sterilization programs and 16 fully customizable options, making it suitable for sterilizing liquids, plastics, textiles, glass, and surgical instruments. The LabSci 85LV features a user-friendly, multi-colored touchscreen interface, making operation straightforward and intuitive. Additionally, its mobility is enhanced with swivel wheels, allowing easy relocation within the lab space without the need for plumbing. Its advanced features, such as integrated temperature probes, a built-in cooling fan, and memory for 999 cycles, along with compliance-enhancing connectivity options like USB, WiFi, and optional printer capabilities, ensure that this autoclave is not only practical but also

compliant with rigorous standards. The Tuttnauer LabSci 85LV is an essential tool for laboratories seeking a reliable, efficient, and economic sterilization solution.

TUTTNAUER LABSCI 60LV VERTICAL AUTOCLAVE

The **Tuttnauer LabSci 60LV Vertical Lab Autoclave** represents a significant advancement in steam sterilization technology, particularly suited for educational institutions and research facilities. This top-loading autoclave, part of Tuttnauer's T-Lab ECO line, is engineered for economic and efficient sterilization of both liquids and solids, boasting a generous 60-liter chamber capacity. Its design facilitates ease of use with a height of just over three feet and a top-loading feature that eliminates the need for counter space. Enhanced mobility is provided by swivel wheels, allowing for easy relocation within the lab environment. The autoclave offers high functionality with four validated programs and sixteen customizable options, making it versatile for a variety of sterilization needs including plastics, textiles, glass, and instruments. Its user-friendly interface features a high-resolution touchscreen, and the device requires no complex plumbing for installation—simply plug it into a power source. With additional features like built-in temperature probes, a cooling fan, and memory for up to 999 cycles, the Tuttnauer LabSci 60LV is designed to optimize lab workflow and productivity, while ensuring rigorous sterilization standards are met.

TUTTNAUER LABSCI15L+ BENCHTOP AUTOCLAVE

The **Tuttnauer LABSCI15L+ Benchtop Autoclave** stands as a premier solution for modern laboratories requiring reliable and efficient sterilization. With a generous 85L (approximately 17 gallons) chamber volume, this autoclave is equipped to handle a variety of materials—from glassware and instruments to biological wastes—across four standard program cycles and up to 16 customizable cycles. Crafted from robust 316L or 316Ti stainless steel, the chamber guarantees longevity and resistance to corrosion. The autoclave features an advanced multi-color control panel for ease of operation, and it requires no plumbing, simply plug in and start. Additional features such as a built-in printer provide detailed cycle documentation, enhancing traceability and compliance. The two-year warranty on parts and labor ensures dependable service while its array of features like fast cooling, efficient drying, and optional biohazard filters make it a versatile asset in any lab setting. Whether for research or clinical applications, the LABSCI 15L+ enhances productivity and maintains strict sterility standards with every use.

TUTTNAUER 3870E AUTOCLAVE

The refurbished **Tuttnauer 3870E Autoclave** offers a spacious **84-liter (22-gallon) capacity within its 15" x 27" chamber**, accommodating substantial sterilization loads. Automated digital controls simplify operation, featuring a 60-minute timer and a clear digital display of temperature and pressure. The included support stand and two 14" x 26.1" stainless steel tray shelves enhance loading convenience. Safety features include a heat-insulated, double-locking door that prevents opening while the chamber is pressurized, protecting users from burns. An automatic low-water-level shut-off safeguards the heating elements from damage. With a temperature range of 105°C to 137°C (221°F to 279°F) and a heating time to 134°C (273°F) of 30 minutes, the 3870E ensures efficient sterilization. The autoclave is UL Listed, CSA Certified, and ASME Stamped, meeting stringent safety and quality standards, and comes with a 6-month parts warranty. Its overall compact dimensions of 34.5" x 26" x 20.6" make it suitable for various settings.

MIDMARK RITTER M11D DENTAL MANUAL AUTOCLAVE

The **Midmark Ritter M11D Dental Manual Autoclave** is a highly efficient and reliable sterilization solution, particularly noted for its refurbished model equipped with an expansive 11" x 18" chamber. This generous chamber size distinguishes it as the countertop sterilizer with the largest capacity currently available, making it exceptionally suitable for processing larger packs and instruments commonly used in dental practices. Key features of the Ritter M11 include a manual door opening designed specifically for dental applications and a robust Steam–Flush Pressure Pulse Air Removal System, which guarantees thorough steam penetration for optimal sterilization. The unit is equipped with self-program controls that allow users to tailor cycle parameters to specific instrument processing requirements, alongside pre-programmed controls for added convenience. The user-friendly green LCD display ensures easy visibility of all indicators, enhancing operational efficiency. The autoclave also includes two trays measuring 9" x 15" and two trays measuring 6.6" x 15", fitting within its external dimensions of 17.8" wide, 23.8" deep, and 17.8" high. Despite its substantial capacity, the Ritter M11 maintains a cycle time of about 30 minutes and a weight of 90 pounds, making it a practical addition to any dental practice seeking reliable and efficient sterilization solutions.

TUTTNAUER EZ10K 220V AUTOCLAVE

The **Tuttnauer EZ10k 220V Autoclave** is a cutting-edge sterilization tool renowned for its efficiency and reliability in medical and laboratory settings. Designed with rapid cycle times, it features a fully automatic, user-friendly interface, making it ideal for high-demand environments where time is crucial. Its advanced closed-door drying system ensures instruments are thoroughly dried post-sterilization, preserving their integrity for immediate use. Constructed with durability in mind, the EZ10k includes robust safety features like automatic shut-off and pressure release mechanisms, which provide operator safety and consistent performance. The spacious chamber accommodates a variety of instrument sizes, allowing for diverse sterilization needs while upholding high infection control standards. The Kwiklave model, a quick cycle variant, reduces total sterilization time by 50%, making it perfect for quick instrument turnover or high-volume settings. Operating on a voltage between 220V and 235V, it may require a buck/boost transformer for optimal performance. With a chamber volume of 6 gallons and a power rating of 2200W, the EZ10k is both powerful and versatile, though it does not include a printer.

COX 6000 RAPID DRY HEAT

The COX Rapid Heat Transfer Sterilizer is a fast, simple solution to your sterilization needs. Because it utilizes heated air that moves at a rate of 2,500 feet/minute, it is able to sterilize objects in as little as six (6) minutes -- faster and easier than any other sterilizer available.

No longer will you and your staff be bothered with all the problems inherent with other forms of sterilizations. Since the dry heat system won't corrode or rust your instruments, you won't have to replace them so often -- thus saving you money.

TUTTNAUER 3870M AUTOCLAVE (REFURBISHED)

The **Tuttnauer 3870M Manual Autoclave** stands as the largest manual table-top autoclave offered by Tuttnauer, continuing to fulfill a significant demand in healthcare facilities and veterinary practices. This robust, straightforward unit provides essential sterilization capabilities, proving reliable even in challenging conditions. With a spacious 15" x 30" chamber, it efficiently accommodates longer instruments or a larger volume of smaller tools, making it an ideal choice for spay and neuter clinics, equine practices, bustling animal hospitals, and multi-practice medical offices. Designed as a freestanding unit, the 3870M requires a dedicated 230 Volt, 13.6 Amp power outlet and operates without the need for special plumbing, as its reservoir is filled with easily accessible distilled water. Routine maintenance is simplified with features like an automatic shut-off at the end of sterilization and dry cycles, a long-lasting electro-polished chamber and door, and a convenient front-located drain valve. Enhanced safety is ensured through a double safety locking device to prevent door opening under pressure and a dual safety thermostat safeguarding against overheating.
