DEFIBRILLATORS

When medical professionals and hospital personnel need a defibrillator, dependability should never be in doubt. Auxo Medical understands the dire importance a trusted and ready to operate defibrillator can make in a life-saving effort.

Providing the latest in technology from Lifepak, Philips, Zoll, and more, Auxo Medical's inventory of refurbished defibrillators are durable, portable, and easy-to-operate. Our defibrillator units are suitable for both EMS and hospital settings. Auxo Medical can provide you with a tough, dependable defibrillators for even the most challenging environment. It has various features for CPR measurement, feedback, ventilation monitoring, storage capacity for EKG recordings, and battery back ups.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

ZOLL R SERIES DEFIBRILLATOR, WITH SP02, NIBP, ETCO2

The **Zoll R Series Defibrillator** seamlessly integrates advanced life support features with comprehensive monitoring capabilities to enhance patient care during critical emergencies. Equipped with Real-CPR-Help for ALS, See Thru CPR filtering, and the CPR Compression Index, it guides responders through high-quality compressions with real-time feedback. The innovative OneStep system simplifies electrode and cable application, while Smart Prompts and the Code Readiness testing system support efficient and effective response. Providing familiarization through the Defib Mentor aid, this device features rectilinear biphasic technology, a 3-lead ECG cable, and integrated SPO2, NIBP, and EtCO2 monitoring—all with all accessories included, ensuring the unit is patient-ready. Biocertified for safety and reliability, the Zoll R Series is a comprehensive, user-friendly defibrillator designed to optimize outcomes in emergency settings.

PHYSIO-CONTROL LIFEPAK 20E DEFIBRILLATOR

The **Physio-Control LIFEPAK 20e defibrillator/monitor** is designed for in-hospital first responders, offering an intuitive interface with sophisticated features crucial for saving lives during cardiac arrest. It utilizes Physio-Control ADAPTIV™ biphasic technology, delivering energy settings up to 360 joules for difficult-to-defibrillate patients, which has proven effective in terminating shockable heart rhythms in patients requiring multiple shocks. The device adapts to various patient environments and is easy to use, even for those infrequently trained in AED operation. Advanced monitoring parameters, such as ECG, external pacing, and pulse oximetry, are clearly displayed through color-matched waveforms and values. The LIFEPAK 20e performs automated daily self-tests and features a battery gauge to ensure readiness. It includes a hospital-grade power cord, 3-lead ECG cable, Quik Combo cable, SpO2 adult reusable finger sensor, test plug, new battery, and a set of adult pads. **It is biocertified and comes with a 1-year warranty**. The device offers two display options, seven main operating modes, and can print a CODE SUMMARY™ report and transfer data records via IrDA version 1.0.

PHYSIOCONTROL LIFEPAK 15

The **refurbished PhysioControl Lifepak 15** is a state-of-the-art medical device designed for comprehensive patient monitoring and emergency response. Equipped with advanced features such as 12-lead ECG, AED, pacing, SpO2, NIBP, EtCO2, and Bluetooth version 2, this device ensures reliable performance in critical situations. The package includes essential accessories like a 12 Lead Cable, Quik Combo Cable, SpO2 Finger Sensor, NIBP Cuff/Hose, and a brand-new battery to ensure readiness and convenience. Additionally, it comes with adult defibrillation pads and 100 mm paper for seamless operation. Certified for biocompatibility and offering a one-year warranty, the Lifepak 15 promises both quality and peace of mind for healthcare providers. Its refurbishment does not compromise its capability, making it a cost-effective solution for medical facilities that demand precision and reliability in patient care.

LIFELINE ARM CHEST COMPRESSION DEVICE RCF-ALO00EN

The **Lifeline ARM Chest Compression Device RCF-AlO00EN**, is a groundbreaking innovation by Defibtech that enhances CPR. This automated mechanical device ensures that every chest compression is delivered with optimal quality and speed, which is crucial for effective resuscitation. The comprehensive package includes the ARM Automated Chest Compression Device Domestic Model RMU-A1000 ACC, complete with a Compression Module (RMC-A1000GG), Frame, and Backboard (RMB-G1000GG). Additionally, it comes with a Battery Pack (RCF-RBP-G1000GG), Backpack Carry Case (RAC-U1100GG), and a set of three Patient Pads (RPP-G1003GG). For enhanced stability, the device includes a Stabilization Strap (RSS-U1000GG) and Wrist Straps (1 set of 2) (RCF-A1010EN). To ensure seamless operation, the package also contains a Power Module charger (RPM-G1000NA), Quick Start Guide (RAC-U1501EN), User Manual (RAC-A1510EN), and additional Wrist Straps (RAC-U1513EN). With the Lifeline ARM, we are committed to providing medical professionals with the tools they need to save lives efficiently and effectively.

LUCAS 2 CHEST COMPRESSION SYSTEM

The **LUCAS 2 Chest Compression System** in emergency medical care significantly enhances outcomes, achieving higher survival rates and nearly 100% positive neurological results in trials compared to manual CPR. By minimizing human errors in chaotic rescue situations, the LUCAS device allows first responders to focus on other crucial tasks, optimizing patient care. Its ability to maintain consistent compression rates and depths ensures better blood circulation to the brain and heart, even during prolonged rescues. The stress of manual CPR is alleviated, allowing us to concentrate on treating the root cause of the patient's distress. Furthermore, the LUCAS device acts as a dependable team member, facilitating efficient teamwork and guiding resuscitation efforts with instructions on ventilation timings. It also provides post-event performance reports for continuous improvement. Safety is paramount, and the LUCAS system ensures secure transport by avoiding awkward postures during CPR in moving vehicles and reducing the risk of rescuer injuries. With its wireless configuration via the LIFENET system, innovative design, and comprehensive features including a piston, frame back plate, carry case, battery, and charger, the LUCAS 2 Chest Compression System is an indispensable tool in our emergency response arsenal.

ZOLL 12 LEAD ECG M-SERIES SIMULATOR

Zoll 12-Lead ECG Simulator is intended for use with Zoll M series defibrillators
Generate realistic 12-lead ECG rhythms by connect your ECG cable to the simulator’s 10 ECG snaps
Independent chest lead and limb lead ECG signals create realistic 12-lead ECGs for each rhythm
Generate ST segment and T wave abnormalities, including Anterior MI, Inferior MI, Antero-Septal ST Elevation, Anterior ST Depression, Lateral ST Elevation, and Inferior ST Elevation
Connects directly to monitor
Does not work with manikin

ZOLL R SERIES DEFIBRILLATOR

The R Series ALS continues to meet the needs of ALS providers the world over, and additional features and parameters are being added on a regular basis. Wi-Fi capability is now available. With the addition of a wireless card, R Series can download and transmit code data wirelessly with just the push of a button. Also available is Defibrillator Dashboard, an optional software program that can further reduce your total cost of ownership. Defibrillator Dashboard will automatically notify clinical engineering if a defibrillator is not ready, and even allows for total remote troubleshooting and monitoring of the defibrillator fleet.

LIFEPAK 15

Physio-Control® defibrillators have set the standard for over 55 years, and the latest version of the LIFEPAK® 15 monitor raises the bar. The LIFEPAK® 15 device offers a sophisticated clinical technologies and operational effectiveness with a rich array of features – like the most powerful escalating energy available (up to 360J), advanced monitoring parameters, and a completely upgradable platform. At the same time, it’s touch enough to stand up to your most challenging environments.
