EDAN F9 EXPRESS FETAL MONITOR

The **Edan F9 Express Fetal Monitor** is a state-of-the-art device designed to provide comprehensive monitoring solutions for fetal and maternal health in various medical settings. Equipped with a vibrant 12.1-inch color touch screen display, this advanced monitor is fully loaded to accommodate twins' fetal heart rate (FHR), maternal parameters, and direct ECG/intrauterine pressure (DECG/IUP) monitoring. The F9 Express is ideal for use in large hospital delivery rooms, private obstetricians' offices, and antepartum clinics, ensuring seamless application across the full spectrum of antepartum, intrapartum, and postpartum care. Boasting an array of features, it includes essential parameters such as twins FHR, TOCO, event marking, and AFM, alongside maternal ECG, non-invasive blood pressure (NIBP), SpO2, and temperature monitoring. Its internal parameters cover IUP and DECG. The monitor's powerful lithium battery ensures four hours of continuous operation, while its 12-crystal pulse wave Doppler waterproof transducer guarantees accurate FHR detection. The device offers signal overlap verification for twins FHR with adjustable offset printing options, and users can benefit from 24-hour waveform playback and quick printing for stored data. With real-time printing speeds of 1, 2, or 3 cm/min, the F9 Express also features an optional built-in wireless module for seamless connectivity to the FTS-3 or Central Nursing Station, and software for efficient data transmission to a PC via Insight Software or CNS Lite.
