Laryngoscopes 2
Verathon Glidescope Roll Stand 3

LARYNGOSCOPES

Video laryngoscopes are advanced medical devices that enhance the intubation process by providing clear visualizations of the airway. Unlike traditional laryngoscopes, these instruments feature a camera and display system, allowing healthcare providers to see the larynx and vocal cords in real-time. This technology is crucial in emergency medicine, anesthesia, and critical care, as it significantly improves the success rate of intubations and reduces the risk of complications, especially in difficult cases.

Key models of video laryngoscopes include the **Verathon GlideScope®, Infinium ClearVue VL3R™ Reusable Video Laryngoscope, and Infinium ClearVue™ VLXL**. The GlideScope® is known for its high-definition video and integrated monitor, making it ideal for both adult and pediatric use. The ClearVue VL3R™ offers a reusable design that is compact and user-friendly, while the Infinium ClearVue™ VLXL features advanced imaging technology and ergonomic design for enhanced performance in various clinical environments. Auxo Medical offers both new and refurbished video laryngoscopes at very competitive low prices.

These devices are widely utilized across several industries, including healthcare, emergency medical services, EMS Transport, and military applications. They are essential for improving airway management, providing training tools for medical education, and ensuring patient safety in high-pressure situations. As technology advances, video laryngoscopes will continue to play a vital role in modern medicine, facilitating better outcomes for patients.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

VERATHON GLIDESCOPE ROLL STAND

The **Verathon GlideScope Roll Stand** is designed to enhance the usability and accessibility of the GlideScope video laryngoscope in clinical environments. Key features include a sturdy and adjustable height design, allowing healthcare professionals to position the device at an optimal viewing level during procedures. The stand is equipped with smooth-rolling casters, enabling easy mobility between different areas of the facility. Additionally, it includes hanging brackets and a basket for blades and accessories, ensuring that everything needed for airway management is organized and within reach. The durable construction of the roll stand provides stability, making it a reliable companion for emergency situations and routine intubations alike.

Monitor and Baton not included - Order: AM-0570-0338-0570-0307
