NANOSEPTIC

Auxo Medical offers clean based on technology, not toxins. Nanotouch (Formerly NanoSeptic) skins and mats turn high traffic public touch points into continuously self-cleaning surfaces.

The surface creates a powerful oxidation reaction that continuously breaks down all organic contaminants. In addition, Nanotouch surfaces offer more than a way to provide customers with cleaner surfaces. Ultimately, it is a way to visually communicate your commitment to their well being at every contact point.

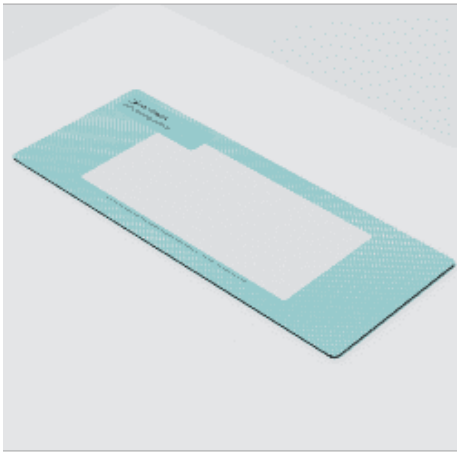

Nanotouch surfaces may be identifiably cleaner than other touch points. They still must clean themselves of larger materials like dirt. They are a complement but not a replacement to the infection control practices that are so important in the world today.

NANOSEPTIC JUMBO SHEET FOR SELF CUTTING

This jumbo sheet is perfect for custom applications where you want to cut your own size peel-and-stick touchpoints. Gridlines at 1/2” and 1” make measuring and cutting custom size skins easy. And “NanoSeptic Self-Cleaning Surface” is repeated over the entire surface, so no matter how you cut it, the surface will always communicate its value.
