PATIENT MONITORS

Auxo Medical offers an extensive line of patient monitors for every medical care setting. Providing efficient and accurate data, our monitors allow medical professionals to stay alert regarding any changes in their patient's status.

We provide accessories for adult, child, and neonatal patients, our patient monitors are accurate, flexible, accessible, and customizable. In addition, we offer units with integrated connectivity allows for easy bedside access to labs, X-Rays, charting, or any other data needed to monitor patients. Our monitors provide your facility with consistent measurements during surgery, transportation, or bedside monitoring. With high-resolution screens and customizable menus, monitors with one-touch functionality allow medical practitioners to maintain precise data on their patients.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

VETLAND V1400 SERIES OPTIONAL ETCO2 MODULE

The **Vetland V1400 Series Optional $EtCO_2$** Module offers versatile capnography options, supporting either mainstream or sidestream measurement to suit various veterinary monitoring needs. Designed for seamless integration with Vetland V1400 series monitors, this module provides accurate end-tidal CO_2 readings, enhancing respiratory and anesthesia monitoring during veterinary procedures.
*Please note this listing is for 1 (one) EtCO2 Module - Mainstream OR Side Stream

VETLAND V1410 MULTIPARAMETER VETERINARY PATIENT MONITOR

The **Vetland V1410 Multiparameter Veterinary Patient Monitor** is a compact, veterinary-specific device designed for comprehensive patient assessment. Featuring a bright 9.8-inch color touchscreen display and weighing around 8 pounds, it provides precise monitoring of ECG (3-lead with multiple filtering modes and sweep rates), Masimo SpO_2, Sun Tech NIBP, respiration, two temperature channels, and two invasive blood pressures. Advanced arrhythmia analysis and veterinary-tailored algorithms enhance diagnostic capabilities. The monitor offers seven days of tabular and graphic trend data storage, and supports both AC power and long-lasting lithium-ion battery operation. Its flexible connectivity includes LAN and wireless LAN to central stations, with compatibility for easy data import into practice management software via SD card or network. Designed to meet the needs of veterinary practitioners, the V1410 combines portability, comprehensive monitoring, and data management in a user-friendly package.

MINDRAY EPM 15M WITH 3/5 LEAD ECG, ARRY ANALYSIS, ST/QT/QTC, NELLCOR SPO2, NIBP, DUAL IBP, TEMPERATURE, RESPIRATION

The **Mindray ePM 15M Patient Monitor** is a comprehensive, versatile device designed to meet diverse clinical monitoring needs. It features a 3- or 5-lead ECG with arrhythmia analysis, along with ST, QT, and QTc interval monitoring for detailed cardiac assessment. The monitor also includes Nellcor SpO_2, non-invasive blood pressure (NIBP), dual invasive blood pressure channels, temperature, and respiration monitoring, providing a full spectrum of vital signs. Its flexible configuration supports both adult and pediatric patient care, making it ideal for operating rooms, ICUs, and Emergency departments where precise, multi-parameter data is essential for patient safety.

CLEO COMPACT ETCO2 CAPNOGRAPHY MONITOR

The **Cleo Compact $EtCO_2$ Capnography Monitor** is a portable, versatile vital signs device weighing less than 3 pounds, designed to meet diverse patient monitoring needs in both bedside and mobile settings. It can be configured as a standalone capnograph or combined with non-invasive blood pressure, SpO_2, and temperature measurements, providing clinicians with customizable options for comprehensive patient assessment. Featuring an intuitive touchscreen interface and a long-lasting lithium-ion battery, the Cleo simplifies operation for any user and seamlessly integrates into various clinical workflows. Its field-upgradeable Infinium capnography module employs a low-flow sidestream method suitable for both intubated and non-intubated patients, with filter-equipped sample lines to prevent cross-contamination, making it an ideal choice for dynamic patient care environments requiring flexible, reliable respiratory and vital sign monitoring.

WELCH ALLYN SPOT MONITOR WITH NIBP AND TEMPERATURE

The **Welch Allyn Spot Monitor with NIBP and Temperature** is a compact, user-friendly device designed for quick and reliable vital signs assessment. It features standard non-invasive blood pressure measurement—including pulse rate and mean arterial pressure (MAP)—along with temperature monitoring. Its large, backlit LCD display ensures clear readability in various lighting conditions. Utilizing the oscillometric method, it accurately determines systolic and diastolic pressures, MAP, and pulse rate. Weighing only 4.5 pounds, this lightweight and portable monitor is ideal for bedside or mobile use, with an available training video to facilitate easy operation in diverse clinical settings.

GE DATEX OHMEDA CARDIOCAP 5 MONITOR

The **GE Datex Ohmeda CardioCap 5 Monitor** offers a comprehensive hemodynamic monitoring solution with an intuitive user interface designed for ease of use. It features 5-lead ECG with ST segment analysis, impedance respiration, pulse oximetry (SpO_2), and non-invasive blood pressure (NIBP) measurement. Built for reliable, real-time patient assessment, the CardioCap 5 provides essential vital sign monitoring in a user-friendly platform suitable for various clinical environments.

RESPIRONICS CO2 MONITORING MODULE

The **Respironics CO_2 Monitoring Module** is an ideal solution for non-intubated patients, featuring a proprietary sample cell that protects the internal NDIR components from contamination, ensuring long-term durability and reliable measurements. Its common connector allows easy interchangeability between mainstream and sidestream monitoring, supported by a robust, maintenance-reducing pump that requires no calibration. The system's small, lightweight LoFlo sensor can be shared across multiple rooms or during patient transport, and it can be mounted on bed rails, IV poles, or integrated into existing monitoring systems. Included with this package are one disposable adult nasal cannula, an adult/pediatric airway adapter set with dehumidification tubing, and a sampling line kit with dehumidification tubing, facilitating versatile and effective respiratory monitoring across diverse clinical settings.

MINDRAY V12 MONITOR ONLY

The **Mindray V12 Monitor** is a versatile, modular patient monitoring platform featuring a 12.1-inch color TFT touchscreen display with up to 8 waveforms, designed to adapt to diverse clinical needs. Its flexible architecture allows for easy addition or removal of modules to customize monitored parameters based on patient acuity or monitoring requirements, making it suitable for a wide range of hospital settings. The V12 supports integration with Panorama Central Stations and Nurse Call Systems, and offers advanced features such as IV drug and hemodynamic calculations, a modern user interface, and easy-to-maintain interchangeable system elements. With a compact design—measuring approximately 13.7 inches high, 9.4 inches wide, and 7.5 inches deep—and weighing just over 8.9 pounds (without batteries), it provides reliable, high-performance monitoring in a lightweight, space-efficient package. Please note that a Mindray Parameters Module must be purchased separately for patient monitoring.

GE DASH 5000 PAITENT MONITOR W/ SIDESTREAM ETCO2

The **GE Dash 5000 Patient Monitor with Sidestream EtCO2** is a highly portable and adaptable monitoring system designed to meet diverse clinical needs across hospital and transportation settings. Featuring advanced parameters such as 12SL™ ECG monitoring, GE EK-Pro™ arrhythmia analysis, ICG, Capnoflex LF Sidestream EtCO2, and GE DINAMAP®, it provides comprehensive vital signs and invasive pressure monitoring with support for up to seven waveforms. Its flexible design includes multiple mounting options, wireless ECG acquisition, and personalized alarm settings, complemented by a bright bedside alarm light for quick patient identification in critical moments. Equipped with two batteries and optimized for demanding transport, the lightweight, durable, and ergonomic Dash 5000 ensures reliable, continuous monitoring from neonatal to adult patients, backed by a one-year warranty.

CRITICARE 506N3 PATIENT MONITOR

The fully refurbished **Criticare 506N3 Patient Monitor** is a compact and reliable vital signs monitor designed to measure heart rate and non-invasive blood pressure (NIBP). It primarily determines heart rate through plethysmographic waveform analysis, with an oscillometric method leveraging blood pressure data during cuff inflation when oximetry is unavailable or not in use. The monitor offers flexible NIBP trend intervals, configurable for 1, 2, 5, 10, 15, 30, 60 minutes, or turned off, enabling customized patient monitoring. Its streamlined design makes it ideal for a variety of clinical settings where accurate, easy-to-use vital signs monitoring is essential.

MEDTRONIC CAPNOSTREAM 20P BEDSIDE MONITOR

The **Medtronic Capnostream 20p Bedside Monitor** is a user-friendly, portable pulmonary and vital signs monitoring device designed for versatile clinical applications across various settings. Featuring an intuitive rotary dial for easy navigation, it non-invasively measures exhaled carbon dioxide ($EtCO_2$) and SpO_2, providing accurate and reliable assessments for all patient types. Its large, bright color display offers clear visualization of waveforms and trends, with capabilities to review up to 72 hours of data, transfer patient information via USB, and utilize in laboratory environments. The monitor includes a thermal printer for case recording, automatically switches to internal battery power during outages, and supports comprehensive data transfer via RS-232 port. With specifications supporting precise CO_2 and SpO_2 measurements, rapid calibration, and a 2.5-hour battery life, the Capnostream 20p is a reliable tool for continuous respiratory monitoring in clinical, procedural, and laboratory settings.

GE CARESCAPE E-MINIC - C02 MODULE

The **GE Carescape E-MiniC - C02 Module** is a compact, reliable solution for precise carbon dioxide monitoring during anesthesia and critical care procedures. Designed to seamlessly integrate with GE’s Carescape anesthesia systems, this module provides real-time, high-accuracy CO_2 measurements essential for patient safety. It includes a **Mini D-Fend Water Trap**, which effectively captures moisture and condensation from the breathing circuit, helping to maintain sensor accuracy and extend its lifespan. Perfect for surgical, intensive care, and respiratory therapy environments, the E-MiniC offers streamlined performance in a space-efficient design, ensuring clinicians have dependable data to optimize ventilation and patient outcomes.

MINDRAY MICROSTREAM CO2 MODULE PASSPORT 8 AND 12

The **Mindray Microstream CO2 Module** (Part Number 115-030771-00, Oridian) delivers accurate CO2 monitoring via the Microstream sampling technology. Compatible with a variety of anesthesia and patient monitoring systems, it provides fast CO2 response, reliable measurements, and straightforward setup. The Passport 8 and Passport 12 variants offer flexible mounting and seamless integration for diverse clinical environments. This module includes an IBP (invasive blood pressure) connection option for integrated physiology monitoring, supporting efficient workflows in perioperative and critical care settings.

GE CARESCAPE B850 PATIENT MONITOR

The **GE CARESCAPE B850 Patient Monitor** is a high-acuity, versatile vital signs monitoring system designed to support clinicians in managing patient flow and care efficiently across various hospital settings, including operating rooms and intensive care units. Its compact dimensions—3.6 inches high, 15.8 inches wide, and 13.4 inches deep—along with a lightweight design of just 16.5 pounds, make it highly maneuverable for bedside use. The monitor features comprehensive parameters including E-PRESTIN EKG, SpO_2, NIBP, and temperature, providing vital data for accurate patient assessment. Its advanced integrated connectivity protocols enable seamless access to lab results, X-rays, and charting, streamlining workflow and data management. The patient data module ensures consistent hemodynamic measurements during intra-hospital transport and supports trend analysis for ongoing patient monitoring. Equipped with innovative algorithms such as GE EK-Pro, GE DINAMAP non-invasive blood pressure, and 12 SL diagnostic ECG with direct two-way communication with MUSE, this monitor offers clinicians reliable, real-time insights for precise diagnoses and improved patient outcomes.

EDAN IM3® VITAL SIGNS MONITOR, NIBP, PR, SPO2, ORAL TEMPERATURE, IM3_NST.O

The **EDAN iM3® Vital Signs Monitor (iM3_NST.O)** is a sophisticated, ultra-slim device featuring an 8" color TFT touchscreen and intuitive controls. Its advanced features include a 120-hour trend review, extensive data storage (1200 NIBP measurements, 200 alarms), and seamless data upload to EMR systems via USB. The iM3 boasts 3 quick-action keys, customizable shortcuts, multiple working modes (Monitoring/Spot/Round), and integrated MEWS/EWS/NEWS scoring. Connectivity options include wired and wireless (built-in WiFi™), and a built-in Li-Ion battery ensures long hours of continuous operation. The device incorporates a strip-light design for 360° visual alarms and a unique cable receiving design. The standard package includes the iM3 monitor, adult SpO2 sensor, extension cable, adult NIBP cuff and tubing, rechargeable battery, equalization conductor, power cord, and temperature probe covers. Optional accessories, such as Nellcor SpO2, Suntech® NIBP, and EDAN Oral QuickTEMP, are available.

WELCH ALLYN SPOT VITAL SIGNS LXI MONITOR

The **Welch Allyn Spot Vital Signs LXi Monitor** is a versatile device designed for efficient and accurate vital signs measurement. Equipped with SureBP™ technology, it measures blood pressure in approximately 15 seconds during cuff inflation, enhancing patient comfort and saving time. In addition to blood pressure (including pulse rate and MAP), the monitor features a Braun ThermoScan PRO 4000 Ear Thermometer for temperature readings and allows manual entry of weight, height, respiration rate, and pain level, calculating Body Mass Index (BMI). It stores up to 50 readings for later review, printing, or downloading and is connectivity-ready for seamless data transfer. The monitor's user-friendly design includes a large, bright LCD display for clear visibility and error messages that provide descriptive solutions rather than just codes. Overall, the Spot Vital Signs LXi is a fast, accurate, flexible, and easy-to-use solution for comprehensive vital signs monitoring.

RESPIRONICS CO2 MONITORING MODULE ONLY M2741A

The **Respironics CO2 Monitoring Module Only M2741A** is a state-of-the-art device that utilizes advanced infrared absorption spectroscopy to accurately measure end-tidal CO2 (EtCO2) and respiration rates. This sophisticated sensor is capable of delivering a precise capnogram for respiratory rates of up to 150 breaths per minute, making it highly effective for a wide range of patients, including infants and smaller individuals, thanks to its efficient sampling rate of 50 ml/min. Within just 20 seconds, the module provides detailed waveform data, ensuring timely and reliable monitoring. Its user-friendly design features simple snap-in sensors, and the device boasts a rugged construction with no moving parts, making it both shock-resistant and IPX4 splash-proof. Additionally, the module is engineered to require no regular calibration, enhancing its convenience and reliability in a variety of clinical settings.

GE B40 PATIENT MONITOR V2 SOFTWARE

The GE B40 Patient Monitor V2 Software is a versatile, semi-modular monitoring system designed for customizable patient assessment with ECG, SpO_2, and NIBP capabilities. Its flexible platform allows selection of multi-parameter configurations, including a dedicated space for a single-width module. The device features advanced hemodynamic options such as 3- or 5-lead ECG, impedance respiration, and non-invasive blood pressure, with an optional 2-channel InvBP for enhanced pressure monitoring. Key clinical technologies include EK-Pro arrhythmia analysis, ST segment analysis, and DINAMAP SuperSTAT NIBP. The V2 software enables the monitor to display anesthesia or CO_2 waveform modules, making it suitable for a range of clinical settings. Please note, this is a monitor-only system.

EDAN IM60

With selectable optional parameters including IBP, cardiac output and capnography, iM60 can adapt to a wide range of sub-acute divisions. The high resolution color TFT-LCD together with the up-to-date customizable shortcut menu design brings easy one-touch access to frequent used functions, allowing more attentions to the patients. Employing low-power consumption design, iM60 is with fanless structure which creates no noise and no dust accumulations. Being embedded with various communication capabilities including HL7, LAN, built-in Wi-Fi, Nurse Call, and Defibrillator Synchronization, iM60 can easily communicate and co-work with hospital information system and other hospital facilities.

GE CARDIOCAP 5 WITH 5 AGENT GAS ANALYSIS

The Cardiocap/5 is a compact, all-in-one monitor designed for use in the operating room, ambulatory surgery unit, induction room and PACU. The Cardiocap/5 offers full vital signs monitoring capabilities from the monitoring of oxygenation and circulation to advanced airway gas analysis and ventilation measurement with Patient Spirometry.

Cardiocap/5 networking options extend the capabilities to centralized monitoring and arrhythmia analysis.

The Cardiocap/5 has an outstanding user interface, the trademark of all GE Healthcare monitors, making it easy use, easy to learn and the perfect partner for any anesthesia machine.

Standard features and Configurations include:

- Outstanding user interface
- Hemodynamics
- ECG
- Impedance respiration
- Pulse oximetry (SpO2)
- NIBP
- Temperature
- Airway Gases: CO2 (N2O), Patient O2, N2O
