STERILE PROCESSING SUPPLIES & ACCESSORIES

Auxo Medical offers a comprehensive range of sterile processing supplies and accessories designed to meet the diverse needs of medical and lab facilities. Our product lineup includes essential items such as heat sealers, printer ribbons, biological indicators, and specialized detergents, all crafted to ensure the highest standards of sterilization and cleanliness.

The Rennco LS24D Lift Seal Heat Sealer, for example, is a top-tier device that ensures a secure seal after a brief warm-up period, enhancing the efficiency and reliability of your sterilization process. Similarly, our 3M™ Attest™ Rapid Readout Biological Indicators provide a rapid and reliable method for monitoring steam sterilization, ensuring patient and personnel safety.

Auxo Medical not only focuses on providing high-quality products but also offers extensive support services to ensure the optimal performance of your sterile processing equipment. Our team is available for consultation, maintenance, and repair services across various locations, including Virginia, North Carolina, and several regions in Florida, among others. By choosing Auxo Medical, you are investing in a partner committed to enhancing the safety, efficiency, and reliability of your medical facility's sterile processing operations.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

STERIDATA LOGGER PAPERLESS STERILIZER CYCLE PRINTER FOR STATIM

SteriData™ Logger for SciCan Statim 2000 and 5000 cassette sterilizers* (must have must have serial port in back and current software)

The paperless alternative to a paper Printer

This SteriData Logger unit plugs in just like the paper printer and sits on top of your Sterilizer. Now all your sterilizer cycle data is saved to the SD card (included) automatically.

When the cycle data is required, simply take the SD card to your computer where all the cycle files are arranged by year and month, date and time.

The individual sterilizer cycle files are recorded as text files and easily displayed and/or printed out from your computer as required. Optionally, you can include your practice name and the sterilizer serial number which will be added to every cycle file.

FLUSH TECH ENDOSCOPE AND LUMENED INSTRUMENT FLUSHING SYSTEM

The **FlushTech™ GI Endoscope and Lumened Instrument Flushing System (7260030)** is a compact, durable, dual-port device designed to improve the efficiency and compliance of endoscope reprocessing. Its robust system facilitates the thorough flushing of detergent, rinse water, and air through all internal and elevator wire channels of flexible endoscopes, reducing reprocessing time while ensuring adherence to strict flushing requirements. The unit features a user-friendly interface, a flow rate of 0.75 GPM, and a maximum suction height of 6 feet, with compatibility for industry-standard high-level disinfectants and detergents in diluted form—excluding isopropyl alcohol. Compact and lightweight at 9.4 lbs, with an IPXO case rating, the FlushTech system maintains detailed processing reports to support quality assurance and survey audits, making it an essential tool for efficient and compliant endoscope reprocessing.

Tuttnauer TIVA Washer DIN Basket A002 Single

TUTTNAUER TIVA WASHER DIN BASKET A002 SINGLE

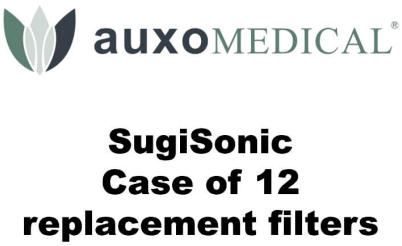

The **Tuttnauer TIVA Washer DIN Basket A002** is a durable, stainless steel cleaning basket designed for use in sterilization and washer systems. Measuring **19 inches x 10 inches x 2 inches**, this single basket provides a secure and organized container for small surgical instruments, trays, or other medical devices during cleaning cycles. Its DIN (Deutsches Institut für Normung) standards ensure compatibility and reliable performance within compatible washer/disinfector systems, helping facilitate thorough and efficient cleaning processes.

UNGER EASY ADAPTER FILL HOSE

The **Unger Easy Adapter Fill Hose** is a 6-foot long, durable hose designed to streamline water filling in cleaning operations. Its length provides easy reach from faucets to buckets, minimizing movement and effort for users, while its robust construction ensures long-lasting performance in high-traffic environments. The hose features a quick and secure faucet connection that prevents detachment, supporting continuous water flow for uninterrupted cleaning tasks. Compatible with Unger dual-bucket systems, it enhances water management efficiency, reduces the need for frequent faucet adjustments, and boosts overall productivity and convenience during cleaning procedures.

SUGISONIC CASE OF 12 REPLACEMENT FILTERS

The **SurgiSonic Case of 12 Replacement Filters** includes in-line 70-micron filters designed to be used with ultrasonic cleaning systems. These filters serve as essential filtering assemblies that immediately trap dislodged debris during cleaning, preventing contamination of the ultrasonic tank’s water solution. Replacing these filters regularly ensures optimal cleaning performance, maintains system efficacy, and upholds sterilization standards by minimizing particulate buildup in the ultrasonic process.

SURGISONIC 1220 (1) VERIFICATION TEST KIT

The **Surgisonic 1220 Verification Test Kit** is an essential set designed to ensure the proper functioning and performance of ultrasonic cleaning equipment. It includes a vial bracket to secure test vials within the cleaning basket, five ultrasonic test vials for evaluating cleaning effectiveness, a temperature strip to monitor process temperature, a lumen test strip holder, and five lumen test strips to assess cleaning in lumened or cannulated instruments. Additionally, the kit comes with a record-keeping sheet for documentation and instructions for use (IFU). This comprehensive kit helps maintain compliance with sterilization standards and confirms optimal operation of ultrasonic cleaners.

RENNCO LS24D LIFT SEAL HEAT SEALER 110/115 VOLTS

The **Rennco LS24D Lift Seal Heat Sealer (110/115V)** is a compact, easy-to-use 24" wide unit that delivers a consistent 1/2" seal with about 30 psi of sealing pressure in roughly 2 seconds. It features a digital temperature control, a safety lift bar with automatic lower bar release, and a non-stick heated sealing surface for reliable operation. Designed for 110/115 V, it draws about 5 A and includes a digital readout for precise settings. With a sturdy 60 lb body and simple edge-in sealing, this sealer is ideal for quick, repeatable bag sealing in small production or packaging environments.

RENNCO LS24D LIFT SEAL HEAT SEALER

Rennco offers the 24 LSD heat sealer. This lift seal heat sealer is ready for use after a short "warm-up" period. You simply adjust the temperature control knob on the heat sealing equipment for the material being used, place the edge of the bag in the seal area, lift the safety bar, and the lift seal automatically makes a 1/2" seal with approximately 30 PSI of consistent sealing pressure. In approximately 2 seconds, the lower safety bar on the heat sealer automatically opens for easy removal of the bag. Constant temperature is maintained by an internal digital heat control during the sealing process. The lift seal heat sealer will not cycle if an object exceeding 1/8" thick is in the sealing area, providing safe operation.

The Rennco 24 LS lift seal heat sealer is quick as well as easy to operate and maintain. The lower silicone rubber bar is raised by a rugged mechanical drive to meet the stationary 1/2" wide heated sealing bar above. This bar is covered with a special "non-stick" fabric which is manually advanced by a simple turn of a knob as the fabric becomes worn. The fabric roll is ample for months of use and is quickly replaced by snapping the new roll into position.

CARBON FILTER REFILL BAGS - TUTTNAUER DS1000/DS1G STEAM DISTILLER

These specialized refill bags contain activated carbon, which is a powerful adsorbent known for its ability to remove impurities, including chlorine, sediments, and volatile organic compounds (VOCs) from water. By integrating these carbon filters into the distillation process, users of the Tuttnauer DS1000 / DS1G systems can achieve higher quality distilled water, which is essential for laboratory applications and medical purposes, The convenience of the refill bags also means that maintaining the distiller's performance and water quality over time is straightforward, ensuring that users consistently have access to clean, pure distilled water without the hassle of frequent equipment maintenance.
