SURGICAL LIGHTING

Exam lights are essential when operating on and examining patients. Auxo Medical offers energy-efficient wall mounted operating room and medical exam lights to ensure you have the illumination you need.

Stocking the highest quality operating and surgical lights from Steris, Skytron, NUVO, and other popular brands. Auxo Medical understands the importance of clarity during procedures. In fact we offer brighter, whiter, and cooler technology, many of our operating room lights omit very little heat. These exam lights offer sterile controls on handles. With long life expectancy and great depth of illumination, our surgical lights ensure your medical practitioners are able to work effectively.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

VISTOR PR LED CEILING EXAMINATION LIGHT

The **VistOR PR LED Ceiling Examination Light** is a high-performance, mid-sized lighting solution ideal for minor surgical procedures, examinations, and general medical use. It offers maximum brightness, sharpness, and true color rendering with a color temperature of 4300°K. The light features a 3-stage dimming system controlled via a sterilizable handle, allowing clinicians to adjust brightness seamlessly within the sterile field. With a fixed reflector diameter of 16 inches and a depth of field of 36 inches, it provides consistent, focused illumination—75,000 lux at 1 meter—with near-zero radiated heat for patient and practitioner comfort. Built for versatility, it operates on standard voltages (120-240 VAC), is UL/CUL and CE approved, and boasts a rated LED lifespan of 50,000 hours, all proudly manufactured in the USA.

AMICO CLARITY 50 EXAM LIGHT, ROLL STAND

The **Amico Clarity 50 Exam Light with Roll Stand** is a lightweight, versatile lighting solution for any hospital room. Equipped with seven powerful LEDs, it delivers up to 50,000 lux of bright, color-accurate illumination at a cool 4400K and a CRI of up to 93, ensuring safe and precise diagnoses. Clinicians can tailor the light with three additional color levels (3300K–4400K) to suit different exam types, and five-stage dimming lets you quickly adjust brightness from a convenient keypad on the back of the head. The Clarity 50 offers flexible arm configurations and mounting options, plus standard and spotlight configurations with a 7-inch head, making it an optimal choice for any examination setting.

STERIS HARMONY LA 585 LED SINGLE HEAD OR LIGHT

Steris Harmony LA 585 LED Single Head OR Light is a high-performance surgical illumination solution designed for exceptional visualization in the operating room. It delivers brighter, cooler white light with up to 41% more illuminance than competing LEDs, a 4400K color temperature (±300K), and a large bright spot up to 160,000 lux, all while maintaining superior color rendering with a CRI up to 96 and robust R9 values for saturated reds. The HD-capable suspension supports virtually any video signal and fiber-optic transmission to Steris HD monitors, enabling razor-sharp images and vivid colors. Designed for flexibility, the system accommodates a wide range of HD signals (DVI, HD-SDI, RGBHV, etc.), supports future upgrades with modular lightheads and monitors, and benefits from efficient cable management for reliable long-term operation.

AMICO LEO SERIES MG 6IN CLINICAL RECESSED DOWNLIGHT

The **Amico Leo Series MG 6" Clinical Recessed Downlight** is a hospital-grade recessed lighting fixture engineered for the demanding needs of operating rooms and clinical spaces. Delivering 1000 to 4000 lumens with a wide beam and glare-free performance, it supports 120/277 VAC, 15–50 W and 0–10 V dimming to 1% for precise light control. With standard 90 CRI (80 CRI available on request) and selectable CCTs from 3500K to 5000K, the Leo MG ensures accurate color rendering across procedures. It features a finsned heat sink for efficient thermal management, is serviceable from beneath the ceiling, and is available in sealed and non-sealed configurations for versatile installation. The fixture is UL-listed for dry and damp locations (ETL), CSA-compliant, and backed by a five-year limited warranty, making it a reliable choice for maintaining optimal illumination in operating rooms and other clinical

AMICO ICE LED SURGICAL LIGHT - DUAL CEILING, 30M/30M LOW CEILING HEIGHT MODEL

The **Amico iCE LED Surgical Light** offers advanced illumination solutions for surgical environments, **specifically designed for spaces with low ceiling heights**. Featuring dual ceiling-mounted light-heads, the **iCE 30M LED** model boasts an impressive 30-inch diameter with 80 LEDs, delivering a powerful 160,000 lux of bright, cool white light. This system ensures optimal visibility with an adjustable light pattern ranging from 7.6 to 12 inches, catering to various surgical needs. With a minimum LED lifespan of 50,000 hours, the lights are both energy-efficient and long-lasting. The iCE LED system also includes smooth surfaces for easy cleaning and comes standard with sterile, disposable covers for the adjustment handle and in-light HD camera, enhancing hygiene and ease of use. The system's exceptional color rendering index of 95 ensures accurate color representation crucial for surgical precision. The innovative low ceiling height configuration accommodates spaces under 9'6", with additional features such as touch switch handles and backup boards, making it a versatile and essential fixture for modern operating rooms. The purchase also requires a universal anchor plate for installation, with an optional round plastic ceiling cover available upon request, and includes a five-year warranty on the bulbs.

MIDMARK RITTER 355 FLOOR STAND LIGHT

The **Midmark Ritter 355 Single Procedure Light**, a perfect blend of quality and affordability tailored to meet the needs of medical professionals. This light is meticulously counterbalanced, ensuring precise positioning without any drifting, which facilitates accurate procedures. With its 4,200 K color temperature and a large pattern size, the light provides an even distribution that enhances shadow control and delivers superior color rendition, crucial for improved diagnosis. The five-caster base design requires less than two pounds of force to move, allowing for effortless repositioning. Additionally, the handle is fully autoclavable, ensuring high standards of hygiene. The Ritter 355's true color temperature generates less heat, which is beneficial for both patient comfort and prolonged use. Its impressive specifications, including the ability to achieve up to 5,000 foot-candles at a 24-inch focal length, make it an indispensable tool in any medical setting.

STERIS LED385 EXAM LIGHT ON FLOOR STAND

The **Steris LED385 Exam Light on a Floor Stand** is a highly efficient medical examination light designed to provide exceptional visibility and color accuracy for healthcare professionals. With a light intensity that reaches up to 50,000 Lux, it ensures that examination areas are well-illuminated. Its 6-inch fixed spot pattern size is ideal for focused assessments, allowing precise illumination without the need to frequently adjust the light's position. The LED385 also boasts a color temperature of 5000° K, simulating natural daylight to aid in accurate color discernment of tissues and surfaces. Its impressive Color Rendering Index (CRI) of 90 further enhances the ability to accurately recognize color nuances, which is crucial during medical examinations. Additionally, the light maintains a low heat-to-light ratio of 3.4 mW/m2-lx, minimizing patient discomfort from heat exposure. Durability is also a key feature, with an average LED bulb life of 30,000 hours, making it a reliable choice for busy clinical environments. This combination of features makes the Steris LED385 Exam Light on Floor Stand an optimal solution for medical settings requiring high-quality, focused lighting.

AMICO ICE LED SURGICAL LIGHT - SINGLE CEILING, 30M

The iCE LED surgical lighting system was designed to illuminate with a bright, white light and an adjustable pattern size that creates a cool and comfortable surgical field. The Amico ceiling mount plate allows for easy installation for new or upgraded lighting.

The LEDs in the iCE surgical lights produce a bright white light that stays cool and lasts a minimum of 50,000 hours. The surfaces of the iCE LED lights are smooth making them convenient and easy to clean.

Each light-head comes standard with sterile, disposable covers for the non-sterilizable pattern of light beam adjustment handle, sterile, disposable covers for the in-light HD camera and sterilizable handles, which allow the user to autoclave the handle before each use.

STERIS HARMONY AIR G SERIES DUAL HEAD LED SURGICAL LIGHT

Exceptional visualization means better patient outcomes

The HarmonyAIR G-Series Surgical Lighting System provides exceptional surgical site illumination and streamlines suspension affordably without compromising quality.

The G-Series surgical light delivers up to 160,000 lux of pure, white LED light with overlapping beams that virtually eliminate shadows. Sterile surgical light handle controls adjust the focus and brightness intensity to consistently assess and interpret tissue and vessel appearance. The G-Series suspension systems are made to the highest quality standards. Their flexible nature integrates with your workflow and case load, providing you with the ideal solution for your unique challenges.

NUVO VU TRIPLE HEAD SURGICAL W/ DUAL LIGHT, ONE CAMERA, AND ONE MONITOR ARM

The **Nuvo VU Triple Head Surgical system, equipped with Dual Light, One Camera, and One Monitor Arm**, represents a significant advancement in surgical lighting technology. Featuring innovative Cross Focus Technology (CFT), this system allows the LED lights to operate independently, enabling precise control over the illumination pattern size, which can be adjusted from 9.5 inches to 14 inches (229 mm to 356 mm). This flexibility ensures consistent light output across both large and small surgical fields. The system boasts an impressive intensity of 160,000 lux and a color temperature of 4300°K, providing natural-like light that enhances visibility. With a high Color Rendering Index (CRI) and R9 Value, both at 95, the lighting system offers exceptional color fidelity, crucial for accurate tissue differentiation during procedures. Additional features include ambient light mode, sterile handle controls for easy adjustments, and a long LED life expectancy of 50,000 hours. The inclusion of a monitor arm enhances the system's functionality, though the monitor itself is sold separately. This high-specification setup is designed to meet the demanding needs of modern surgical environments, ensuring optimal illumination and improved operational efficiency.

STERIS VLED SINGLE HEAD CEILING MOUNTED SURGICAL LIGHT

The **Steris Harmony vLED Surgical Lighting System** stands out as a highly versatile and technologically advanced solution for various medical environments. Designed to cater to a broad range of surgical and diagnostic needs, this modular and configurable system offers unparalleled illumination quality, essential for precision in procedures. With a maximum central illuminance of 160,000 lux and an adjustable pattern size, it ensures optimal visibility in both small outpatient surgery centers and large acute care suites. The system's color temperature of 4400K and an impressive Color Rendering Index (CRI) of 96 enable medical professionals to discern subtle variations in tissue color and texture, critical during intricate surgeries. Moreover, its low heat-to-light ratio minimizes the thermal discomfort often experienced in intensely lit settings, enhancing the comfort of both the surgical team and the patient. With a long lifespan of 30,000 hours, the Harmony vLED system is not only effective but also an economical lighting solution for operating rooms, emergency departments, and intensive care units.

SKYTRON STELLAR SERIES

Stellar® provides advanced lighting performance with high intensity, shadow-free and focusable optics, offering precise surgeon focus control for every procedure while retaining maximum intensity. Extended working distances, beyond one meter, are not uncommon for many surgical procedures such as OB-GYN, Orthopedics, Vascular, and Urology. Stellar's advanced VSRD Optics provide surgeons with sterile focus control. Just a 1⁄4 turn of the sterile center focus handle captures maximum intensity at any distance without having to physically reposition lightheads.
