SURGICAL TABLES

A superior surgical table is the foundation for better patient outcomes. Auxo Medical wide range of surgical tables, exam tables, and orthopedic tables provide a solution for every operating room and budget. Furthermore, on most typical tables, the head area is removable and may have an assortment of attachable head rests. In addition, our selection features operating tables ideal for use in hospital. Whether you're searching for flexibility, optimal imaging, or affordability, we carry the technology you need to improve safety.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

Mindray V6 Surgical Table Extension

MINDRAY V6 SURGICAL TABLE EXTENSION

The **Mindray V6 Surgical Table Extension** is a versatile accessory designed to expand the functionality and coverage of the Mindray V6 surgical table. Engineered to enhance surgical flexibility, this extension provides additional surface area, allowing for better patient positioning and support during complex procedures. Its robust construction ensures stability and durability, making it an essential component for surgical environments that require precise patient alignment and optimal access. Compatible with the Mindray V6 surgical table, this extension helps healthcare providers deliver more effective and efficient surgical care by accommodating a wider range of patient sizes and procedural needs.

SKYTRON 6600B SURGICAL TABLE

The **Skytron 6600B Surgical Table** is a versatile, high-capacity operating table designed to support demanding surgical procedures with exceptional imaging access. Capable of lifting up to 1,000 lbs and articulating up to 600 lbs, it features removable Back and Leg Sections that accommodate Carbon Fiber components for enhanced imaging windows. Its 210° rotating top improves access for C-arm and microscope use, while the stable, rigid surface ensures patient positioning remains secure throughout surgery. The table can be upgraded with an x-ray top for unobstructed cassette passage, supporting films up to 14" x 17". Fully tested to four times its rated capacity for patient weights over 600 lbs, it includes a manual brake release, backup controls, and a 4-point auto-leveling braking system for added stability. With adjustable height, Trendelenburg, reverse Trendelenburg, and multiple tilt and flex functions, the Skytron 6600B offers comprehensive flexibility for various surgical needs.

BIODEX 058-878 30IN WIDE TOP IMAGING TABLE

The **Biodex 058-878 30" W Top Imaging Table** is a C-Arm imaging table that is a high-stability, three-axis motorized platform designed for precise, quiet positioning and optimal image access. It features a low-attenuation carbon fiber 30" wide top, a 93" overall length, and a 500 lb weight capacity to accommodate a wide range of patients. The rectangular 90" L x 30" W top sits on high-speed actuators with 30"-40" height adjust, 0-20° Trendelenburg and reverse Trendelenburg, and 0-20° lateral roll for versatile patient positioning. The table is equipped with hand control for all movements, locking 5" swivel casters for mobility, and supports both 115 V and 230 V configurations. A compact base and optional battery operation enhance flexibility in the OR, facilitating rapid setup and stable, vibration-free imaging during procedures.

MORGAN MEDESIGN FLTLT-FW (FLOAT-TOP, FREE-WHEEL CONFIGURATION)

The **Morgan MEDesign FLTLT-FW Float-Top, Free-Wheel Imaging Table** is a high-precision fluoroscopy-ready C-Arm compatible platform featuring a float-top, radiolucent surface and multidirectional motion. Its free-floating longitudinal and lateral movement enables micro-adjustments during procedures without repositioning the patient, while a powered height-adjust system provides ergonomic, effortless vertical changes. With a free-wheel base and integrated locking, the table moves easily yet stays securely in place when needed. The radiolucent tabletop, coupled with Trendelenburg and reverse Trendelenburg options on select configurations, supports a wide range of interventional and diagnostic applications. Designed to handle up to approximately 500 lbs (227 kg), it measures about 80" (203 cm) in length and 24" (61 cm) in width, with a height range of 28-40" (71-102 cm). The table weighs around 1,250 lb (567 kg), reflecting its robust construction and suitability for demanding clinical environments.

STI ECONOMAX 4

The **STI EconoMAX 4** is an economical, versatile mobile imaging table designed for high efficiency and patient comfort in medical facilities such as imaging centers, surgical suites, and pain management clinics. Equipped with motor-driven movements for height adjustment (28" to 38"), lateral tilt (+/-17°), and Trendelenburg tilt (+/-13°), it allows precise positioning tailored to various procedures. The table features a 24-inch wide top with a high-quality, 2-inch thick patient comfort pad, eliminating the need for arm boards in many cases. Its design includes locking swivel casters for easy mobility, a narrow base for straightforward patient transfer, and a facial cut-out suitable for prone procedures. With a standard 500-pound load capacity, the EconoMAX 4 offers excellent value, combining multiple adjustable movements with a low boarding height, making it an ideal choice for busy medical environments seeking affordability without sacrificing functionality.

STERIS 5085 SURGICAL TABLE

The **Steris 5085 Surgical Table** is a versatile, adaptable solution designed to meet the needs of virtually every surgical specialty. Its higher weight capacity, exceptionally low height, and expansive imaging area eliminate the need for inflexible, dedicated specialty tables. With quick, one-touch patient positioning, the 5085 leverages an intuitive hand control featuring pre-programmed positions for rotation and beach chair setup, simplifying procedures and reducing setup time. An easy-to-read LCD display communicates precise table positioning data to caregivers, even in dimly lit operating rooms. Key features include a generous patient weight capacity of up to 1,200 lbs, a wide height range from 22.8" to 42.5", and a four-section tabletop that contours to virtually all patient postures. The table also provides unrestricted perineal access with a removable leg section, a powered radiolucent kidney elevator for lateral procedures, and compatibility with a broad range of existing accessories. Designed for safety and efficiency, it includes self-leveling floor locks, auto limit sensors to prevent collisions, and a manual override option. Whether supporting minimally invasive surgery, cardiothoracic, orthopedic, or neurosurgical procedures, the Steris 5085 ensures outstanding access, imaging, and patient support in a reliable, user-friendly package.

PATIENT TRANSFER ROLLER BOARD - 67" X 15"

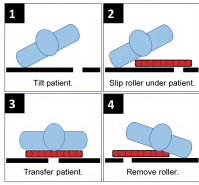

67" x 15"

Mid Central Medical's Patient Transfer Roller Board (67" x 15") is designed to ease staff workloads and reduce lifting during patient transfers. At 67" long, it accommodates larger patients or scenarios requiring a full-length transfer board, allowing smooth movement between beds, gurneys, operating tables, X-ray tables, exam tables, and cast tables. The board features smooth-rolling rollers, a protective cover, and is intended to facilitate safe, effortless transfers with minimal friction and effort.

SURGICAL TABLES INC. SPINEXR TABLE

Designed to meet the demanding needs of spine procedures, the **STI SpineXR Table** offers superior positioning, safety, and versatility—comparable to the OSI Jackson Table. Custom-built for precision, this table features motorized patient rotation programmable up to 360 degrees, making it ideal for procedures requiring height adjustment, Trendelenburg positioning, and lateral rotation. Its proprietary adjustable length accommodates patients from 4'8" to 6'6", ensuring optimal comfort and support across a wide range of body types. Equipped with carbon fiber support rails compatible with other brand accessories, four swivel, total-lock castors, and user-friendly controls, the SpineXR Table delivers both safety and convenience. Key features include an audible power-up message, emergency stop, illuminated power switch, and a removable power cord for ease of use. With a robust 500 lb weight capacity and dimensions of 88"-102"L x 29.5"W, this table is a reliable addition to any surgical suite.

MINDRAY HYBASE V6 SURGICAL TABLE W/ LONGITUDINAL SLIDE AND CARBON FIBER EXTENSION (STAINLESS STEEL BASE)

The **Mindray HyBase V6 Surgical Table with Longitudinal Slide and Carbon Fiber Extension (Stainless Steel Base)** is designed to meet the complex demands of modern surgical procedures. With an impressive load capacity of up to 460 kg (1014 lbs), it accommodates a wide range of patients, ensuring stability and safety during operations. The table permits all positions up to an overall load of 250 kg (551.1 lbs), offering versatility for various surgical needs. Its advanced design includes a longitudinal shift of up to 350mm (13.8"), facilitating seamless access to C-arm imaging, complemented by head-end and foot-end shifts of 6.3" and 7.5" respectively. The table's height adjusts from a low 600mm (23.6") for neurosurgery to a high 1,050 mm (41.3") for orthopedic procedures. It features 12 electric movements, including table top adjustments and tilts, all controlled via a Bluetooth hand control for ease of use in the operating room. Ensuring maximum safety, the table includes an independent manual override system, a triple-layer

decompression pad for patient comfort, and IPX5 water resistance. Its bellows-free design, coupled with four double-swivel castors, enhances maneuverability. The package includes arm boards, an anesthesia frame, memory foam pads, a stainless steel base cover, a longitudinal slide, a kidney lift, and a carbon fiber extension that optimizes imaging areas at both the head (64.9") and foot (56.7") ends, making it a comprehensive solution for healthcare providers.

MINDRAY HYBASE V6 SURGICAL TABLE W/ LONGITUDINAL SLIDE (STAINLESS STEEL BASE)

The **Mindray HyBase V6 Surgical Table with Longitudinal Slide (Stainless Steel Base)** is designed to meet the diverse needs of surgical teams. With an impressive load capacity of up to 460 kg (1014 lbs) and the ability to accommodate all positions up to an overall load of 250 kg (551.1 lbs), this table ensures stability and safety during complex procedures. It features a longitudinal shift of up to 350mm (13.8"), providing easy access to C-arm imaging, crucial for precision in surgical interventions. The table offers a head-end shift of 6.3" and a foot-end shift of 7.5", with a versatile height range from 600mm (23.6") for neurosurgical procedures to 1,050mm (41.3") for orthopedic operations. With 12 electric movements, including table top adjustments and tilt functions, the HyBase V6 adapts seamlessly to various surgical requirements. Its Bluetooth hand control offers unobstructed management in the operating room, while an independent manual override system enhances safety. The table is equipped with a triple-layer decompression pad for optimal patient comfort and weight distribution, and boasts IPX5 protection against water jets. Its bellows-free design and four double-swivel castors enhance mobility. Inclusions such as arm boards, an anesthesia frame, memory foam pads, a stainless steel base cover, a longitudinal slide, and a kidney lift add to its functionality, with additional options like a carbon fiber table top available for customization.

MINDRAY HYBASE V6 SURGICAL TABLE (STAINLESS STEEL BASE)

The **Mindray HyBase V6 Surgical Table**, featuring a robust **stainless steel base**, is a marvel of modern medical engineering designed to accommodate diverse surgical needs with precision and safety. With an impressive extreme load capacity of up to 460 kg (1014 lbs), it ensures stability and reliability during complex procedures. Its versatile design allows for all positions to be maintained with an overall load of up to 250 kg (551.1 lbs), catering to a wide array of surgical requirements. The table's height adjustability, ranging from a low 600 mm (23.6") ideal for neurosurgery to a high 1,050 mm (41.3") optimized for orthopedic procedures, ensures ergonomic access for surgeons. The table offers 12 electric movements, allowing seamless adjustments such as tabletop elevation, slope, and tilt, all of which can be controlled unobstructedly via a Bluetooth hand control. Safety is enhanced with an independent manual override system, complemented by a triple-layer decompression pad that redistributes the patient's weight for comfort. Its IPX5 protection rating guards against water jets from any direction, ensuring durability. The bellows-free design, stainless steel base cover, and four double-swivel castors facilitate easy maneuverability. Standard inclusions such as a pair of arm boards, an anesthesia frame, and memory foam pads enhance functionality, while optional features like a longitudinal slide, kidney lift, and carbon fiber tabletop offer additional customization.

MINDRAY HYBASE V6 SURGICAL TABLE (PLASTIC BASE)

The **Mindray HyBase V6 Surgical Table with a plastic base** is a state-of-the-art solution designed to meet the diverse needs of modern surgical environments. With an impressive load capacity of up to 460 kg (1014 lbs), this surgical table accommodates a wide range of patients. It permits all positions up to an overall load of 250 kg (551.1 lbs), ensuring versatility and safety. The table features a remarkable height adjustment range, from a low of 600mm (23.6") suitable for neurosurgery to a high of 1,050 mm (41.3") ideal for orthopedic procedures. Its 12 electric movements, including tabletop up/down, slope, and tilt, provide adaptability for various surgical requirements. A Bluetooth hand control allows for unobstructed operation within the operating room, while an independent manual override system offers dual safety assurance. The triple-layer decompression pad ensures optimal weight redistribution for patient comfort. Additionally, the table is equipped with IPX5 protection against water jets, ensuring durability and hygiene. The bellows-free

design and plastic base cover, complemented by four double-swivel castors, enhance mobility and ease of use. Standard inclusions such as a pair of arm boards, an anesthesia frame, and memory foam pads offer comprehensive support, while optional features like a stainless steel base cover, longitudinal slide, kidney lift, and carbon fiber tabletop provide further customization.

MAYFIELD HEADREST - BASIC HEADREST

The **Mayfield Headrest - Basic Headrest** is expertly designed to offer superior cranial stabilization in both prone and supine positions, ensuring optimal patient comfort and safety during medical procedures. It features both lateral and vertical mobility, allowing for precise positioning of the patient's head, which aids in better distribution of weight and forces to effectively combat pressure necrosis. The headrest comes with an A1011/1012 Adult Horseshoe headrest and a powder-coated frame for enhanced durability. To maintain hygiene and extend the product's life, replacement gel pads are available individually. Additionally, the headrest is equipped with a new vinyl foam pad, providing an extra layer of comfort. The product is backed by a six-month warranty covering any manufacturer's defects, underscoring its quality and reliability.

MIZUHO OSI 6875 HANA TABLE

The **Mizuho OSI 6875 Hana Table** is a versatile and specialized surgical table designed to enhance orthopedic procedures, particularly those involving the lower extremities. Equipped with a comprehensive range of accessories, it ensures precision, safety, and ease of use during complex surgeries. Key components include the Femoral Hook Support and Classic attachments for both left and right positioning, facilitating optimal femoral management. The Femur Lift Foot Pedal and its extensions provide controlled elevation of the femur, critical for accurate surgical access and alignment. Additional features like the Traction Hook Extension and Radiolucent Leg Spars support seamless traction and imaging compatibility. The table's ergonomic design includes Arm Boards with Pads, the Hana Knee Flexion System for total knee arthroplasty, and a Well Leg Support Adaptor, ensuring patient stability and comfort. Safety is prioritized with elements such as the Pelvic Pad, Perineal Post and Pad, and the Patent Safety Strap. With its Articulating Bracket and Well Leg Upright Support Assembly, the Hana Table embodies a comprehensive solution for modern orthopedic surgery, enhancing both surgical outcomes and operational efficiency.

STERIS SURGIGRAPHIC 1027 C-ARM IMAGING TABLE

The **Steris SurgiGraphic 1027 C-Arm Imaging Table** is a highly advanced surgical platform designed for optimal patient imaging and versatility in the operating room. Constructed with a carbon fiber tabletop supported by dual columns and a mobile base assembly, this table allows for comprehensive 62" (1575 mm) patient body scans, enhancing image-guided procedures. Its unique 45° edge contour facilitates easy accessory attachment while enabling 360° patient imaging capability with a fluoroscopic C-Arm. The table measures 28" (711 mm) in width, 91" (2311 mm) in length, with an adjustable height ranging from 28" to 41" (711 mm to 1041 mm). It supports a maximum patient weight of 500 lbs (226 kg), ensuring stability and reliability. The standard configuration boasts features such as a Tri-Level Technology (TLT) tabletop pad, adjustable height, Trendelenburg and lateral tilt functions, electric power, pendant hand control, and a mobile base with locking casters. Additionally, it includes a 2-inch standard comfort pad and operates at 115 VAC, 60 Hz, 3.5 Amp. The table's motion capabilities include height adjustments from 28" to 41" (711 mm to 1041 mm), Trendelenburg/reverse Trendelenburg from 0-10°, and lateral tilt from 0-17°, making it a versatile and essential tool for modern surgical environments.

SKYTRON 6702 SURGICAL TABLE

Currently being sold new by Skytron, the 6702 model has been manufactured since 2013

Skytron 6702 Hercules allow 210 degree top rotation at the turn of a handle, making procedure and imaging setup easier than ever. Seamlessly rotate the table toward the C-arm or transition the patient between the surgeon and anesthesiologist during head-end procedures. Featuring 1,200 pound lift and 1,000 pound articulation capacity combined with our lowest table height, the 6702 Hercules can also support bariatric patients with comfortable surgical access. Its radiolucent top permits sharp image amplification while the sturdy side rails will accept a full range of complementary accessories. From its ease of setup to its impressive power, the 6702 Hercules helps any operating room manage a greater variety of procedures with only one surgical table!

The 6702 hercules also brings confidence to the operating room. Recognized for their reliable performance, Skytron surgical tables are consistently rated as having a lower cost of ownership.
