TEMPERATURE MONITORING

Auxo Medical offers two temperature monitoring devices. Both the infrared non-contact thermometer and temperature and facial recognition scanner. Temperature monitoring help you maintain proper temperatures and alert you in real-time if temperatures go outside their optimal range.

Thermometers have been the industry standard for years due to their accessibility and ease of use. Staff can place them virtually anywhere with minimal installation time or concerns about networks or batteries. Additionally, the data they provide requires little explanation.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

INFRARED NON-CONTACT THERMOMETER

Non-contact Body Infrared Thermometer is specially designed to take the body temperature of a person regardless of room temperature. These medical quality thermometers are perfect for measuring the temperature of a baby or adult by checking their forehead, with its safe no-contact laser temp design.
