TOURNIQUETS

Auxo Medical carries a wide range of tourniquets that help improve safety, precision, and speed during medical examinations and surgical procedures. Offering a wide range of controls and features, get the compression you need with our industry leading tourniquets. It can assist in any emergent or non-emergency situation or procedure.

Our selection of factory level refurbished tourniquets offers numerous dual port, dual cuff systems with controls to measure pressure accurately. Also, several models offer precise microprocessors. This includes alarms to warn medical professionals of any hazardous conditions. In addition, it features like easy-to-read displays, touch pad controls, fast cuff inflation or deflation, and one-hour battery backup. Plus, with disposable and reusable cuffs to fit all patient sizes, our leading selection keeps you and your facility operating smoothly and efficiently in all situations.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

STRYKER SMARTPUMP DUAL CHANNEL TOURNIQUET

The **Stryker SmartPump Dual Channel Tourniquet System** (Reference #5920011000) offers advanced, continuous monitoring and precise control of tourniquet pressure during surgical procedures. Designed to support both single and dual-channel configurations, it seamlessly integrates with OR software systems, allowing for real-time data communication. This versatile system accommodates a variety of surgical needs, including single cuff, Bier Block, bi-lateral, and simultaneous upper and lower extremity procedures. Each cuff's pressure and inflation duration are independently adjustable, with real-time display and monitoring to enhance safety and efficiency. Post-operation, tourniquet data can be printed and incorporated into patient records, making the SmartPump system an essential tool for modern surgical environments.

ZIMMER ATS 4000 TOURNIQUET

The Zimmer ATS 4000 Tourniquet System doesn’t just stop blood flow; we strive to personalize pressure for the patient by delivering the minimum tourniquet pressure at a specific time, with a specific cuff, for a specific patient limb. It has been found that when applying a lower tourniquet pressure is results in less post-operative pain. Using Personalized Pressure Technology the ATS 4000 can minimize tourniquet pressure and pressure gradients. This helps reduce the risk of nerve-related injuries.

ZIMMER ATS 3000

The **Zimmer A.T.S.® 3000 Automatic Tourniquet System** is a state-of-the-art dual-port, dual-cuff system designed with microprocessor controls and dedicated ports that supply and measure pressure independently. This advanced system features the innovative Limb Occlusion Pressure (LOP) technology, which accurately detects, calculates, and reports the precise cuff pressure required to achieve complete blood occlusion in the operative limb. The A.T.S.® 3000 Tourniquet exemplifies Zimmer's long-standing commitment to safety, reliability, and convenience, boasting a four-hour battery backup to maintain pressure during power loss, along with visual and audible alarms for enhanced safety. Additional features include self-check calibration, a lightweight and portable design, color-coded cuffs ranging from 8 to 42 inches, and a convenient carrying handle. The system also ensures rapid inflation and deflation, independent pressure monitoring, and a cuff lockout feature that prompts users to confirm deflation commands, reducing the risk of complications from sudden cuff deflation. Built-in safety features and positive locking connectors for leak-free inflation make the A.T.S.® 3000 a versatile and dependable choice for use on a table or IV pole.
