ULTRASONIC CLEANERS

Auxo Medical provides the top brands of ultrasonic cleaners for hospitals and healthcare facilities. Auxo Medical has refurbished and new ultrasonic cleaning equipment. With our competitive pricing, it can fit your budget and increase your facility’s effectiveness.

Whether you're looking to have either, we offer both complete ultrasonic cleaning systems or individual components. As a result, we provide your facilities with the ultrasonic machine it needs. The selection includes submersible-type transducers, bench-top cleaners, tanks, and consoles. We also have multi-tank systems, automated transfer packages, watt meters, and custom cleaning systems. More importantly, they are designed with high performance and longevity in mind. Ultimately, refurbished ultrasonic cleaners can streamline your facilities workflow. It can also maintain optimum operational effectiveness.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

STERIS INNOWAVE™ UNITY IW523046NPR ULTRASONIC CLEANER

The **Steris InnoWave™ Unity IW523046NPR Ultrasonic Cleaner** is a highly efficient, three-phase ultrasonic irrigator designed to meet the demanding needs of modern operating rooms. Standing at 42.5 inches tall, with a width of 34.8 inches and a depth of 25.8 inches, this system can accommodate up to 16 lumened devices per cycle, making it ideal for high-volume surgical environments. Capable of processing approximately 25 pounds of equipment per cycle, it features automated, precise dosing of cleaning chemistry to ensure consistent results and reduce errors. Its customizable cycles allow users to tailor cleaning parameters to meet specific device instructions for use (IFUs), ensuring compliance and optimal cleaning efficacy. Additionally, the Unity IW523046NPR offers digital cycle data download via USB, storing up to 10,000 cycles for easy audit readiness and regulatory compliance.

MINDRAY VETUS M10 WITH 2 PROBES

The **Mindray Vetus M10** is a portable, veterinary-specific ultrasound system designed for versatile and high-quality imaging in both clinical and field environments. It features a lightweight design with a 15.6-inch LED monitor, robust 256GB SSD for data storage, and advanced imaging technologies like Smart B-Line and iWorks breed-specific protocols, which enhance image clarity and diagnostic confidence. Equipped with intuitive controls, veterinary presets, and a broad range of compatible probes (including the two probes included), the Vetus M10 streamlines workflow for abdominal, cardiac, musculoskeletal, and reproductive examinations across various animal species. Its long battery life and ergonomic portability make it suitable for in-clinic and on-location diagnostics, ensuring veterinary professionals can deliver accurate, confident diagnoses anywhere. Included with purchase are onboard training tools, virtual training sessions with a registered sonographer, and a comprehensive 5-year warranty for added peace of mind.

Steris InnoWave PCF Si - Multi-Basket

STERIS INNOWAVE PCF SI - MULTI-BASKET

The **Steris InnoWave PCF Si - Multi-Basket** is a versatile ultrasonic cleaning system designed to process multiple surgical instruments simultaneously. It can accommodate up to 10 Si EndoWrist® instruments (8mm, 5mm, or single-site configurations) or 6 Si Staplers. This multi-basket setup facilitates efficient, thorough cleaning and sterilization of complex surgical tools in a single cycle, supporting streamlined workflow and proper instrument care in busy medical settings.

SKU: AM-IW1037

STERIS INNOWAVE PCF SONIC IRRIGATOR

The **Steris InnoWave PCF Sonic Irrigator** is an ultrasonic cleaning system engineered to enhance workflow efficiency in busy operating room environments. Its systematic cleaning process combines sonic activity and irrigation to thoroughly clean small, complex instruments, especially those with crevices and internal channels. Sonic vibrations dislodge exterior soils, while sonically charged jets of cleaning solution dislodge and flush soils from internal channels, especially effective for lumened instruments. The high-impingement deluge wash prevents blood and soils from redepositing on instruments, with six integrated spray nozzles further reducing this risk. Designed to process up to 20 lumened instruments with a maximum load weight of 44 lbs, it includes a standard instrument basket and operates on 208V, 3-phase power. Robotic instrument baskets are available separately. Regular preventive maintenance (PM) is required to keep the warranty valid.

Steris InnoWave PCF Xi - Multi-Basket

STERIS INNOWAVE PCF XI - MULTI-BASKET

The **Steris InnoWave PCF Xi - Multi-Basket** is a versatile ultrasound equipment accessory designed to accommodate multiple surgical instruments simultaneously. It offers a capacity for up to 6 Xi EndoWrist® instruments (8mm, 5mm, or single-site configurations), or a combination of 4 Xi EndoWrist® instruments along with 2 Xi Staplers. This multi-basket setup facilitates efficient, thorough cleaning and sterilization of complex surgical tools in a single cycle, optimizing workflow and ensuring proper instrument maintenance.

UNGER EASY ADAPTER FILL HOSE

The **Unger Easy Adapter Fill Hose** is a 6-foot long, durable hose designed to streamline water filling in cleaning operations. Its length provides easy reach from faucets to buckets, minimizing movement and effort for users, while its robust construction ensures long-lasting performance in high-traffic environments. The hose features a quick and secure faucet connection that prevents detachment, supporting continuous water flow for uninterrupted cleaning tasks. Compatible with Unger dual-bucket systems, it enhances water management efficiency, reduces the need for frequent faucet adjustments, and boosts overall productivity and convenience during cleaning procedures.

SUGISONIC CASE OF 12 REPLACEMENT FILTERS

The **SurgiSonic Case of 12 Replacement Filters** includes in-line 70-micron filters designed to be used with ultrasonic cleaning systems. These filters serve as essential filtering assemblies that immediately trap dislodged debris during cleaning, preventing contamination of the ultrasonic tank’s water solution. Replacing these filters regularly ensures optimal cleaning performance, maintains system efficacy, and upholds sterilization standards by minimizing particulate buildup in the ultrasonic process.

SKU: AM-SS-3112

SURGISONIC 1220 (1) VERIFICATION TEST KIT

The **Surgisonic 1220 Verification Test Kit** is an essential set designed to ensure the proper functioning and performance of ultrasonic cleaning equipment. It includes a vial bracket to secure test vials within the cleaning basket, five ultrasonic test vials for evaluating cleaning effectiveness, a temperature strip to monitor process temperature, a lumen test strip holder, and five lumen test strips to assess cleaning in lumened or cannulated instruments. Additionally, the kit comes with a record-keeping sheet for documentation and instructions for use (IFU). This comprehensive kit helps maintain compliance with sterilization standards and confirms optimal operation of ultrasonic cleaners.

SKU: AM-SS-1220

SURGISONIC 1211X ULTRASONIC CLEANER

The **SurgiSonic 1211X Ultrasonic Cleaner** is a high-performance, specialized cleaning system designed for thorough sterilization of all types of surgical instruments, including submersible, tubular, cannulated, and robotic instruments such as those used in da Vinci® systems. Featuring a patented dual hookup method with an independent filtered flushing system combined with ultrasonic action, it effectively dislodges stubborn debris and ensures comprehensive cleaning. Each tubular instrument has its dedicated suction chamber, filter, and pump, with debris immediately trapped in a 70-micron filter to prevent contamination of the cleaning solution. Capable of simultaneously pre-cleaning three robotic instruments and six tubular instruments (sizes ranging from 1.7mm to 12mm), the unit is equipped with six suction chambers, multiple inlet nipples, filters, pumps, and a drain, all housed within a compact countertop design measuring 34" wide by 16" deep by 16.5" high, with a 5-gallon internal tank. Additional features include a digital countdown timer, level sensor to prevent dry operation, tank heater, and an optional perforated basket. Exceeding AAMI TIR 30 standards and comparable to the Skytron Flex CT6, the SurgiSonic 1211X ensures superior cleaning efficiency for robotic and non-robotic surgical instruments.

DURASONIC DS8L 2.1 GAL DIGITAL ULTRASONIC CLEANER

The **DuraSonic DS8L** is a robust 2.1-gallon digital ultrasonic cleaner designed to deliver industrial-strength performance at a benchtop price. This model features ceramically enhanced transducers for extended lifespan and comes with a lifetime warranty on the heater, plus a 2-year warranty on parts and labor. User-friendly features include a main on/off switch, digital displays for temperature and cleaning time, adjustable cleaning time (including continuous operation), and adjustable bath temperature from 20-80 degrees Celsius. The DS8L includes a lift-off cover, basket, and is proudly made in the USA, offering a reliable and efficient cleaning solution. Tank size: 11.75" x 9.5" x 4" (LXWXD), Unit Dims: 18" x 11" x 10.75".

SHARPERTEK ULTRASONIC CLEANER (27IN TABLE TOP UNIT)

The **Sharpertek 27-inch Table Top Ultrasonic Cleaner** is a robust and versatile cleaning solution designed for countertop applications. Featuring a durable 14-gauge stainless steel 304 tank with meticulously tested welds, this unit offers a tank size of 27”x6”x8” and utilizes 400 watts of ultrasonic power at a frequency of 40 KHz, enhanced by Sweep Technology for uniform and robust cleaning. It incorporates a built-in degas function, adjustable feet for stabilization, and a generator that is individually fused and fan-cooled for extended service life. The cleaner also includes a drain with a ball valve, plugged fill ports, and an 800-watt heater capable of reaching 130 degrees Fahrenheit, with optional stainless steel filtration and rinse tank systems, as well as a stand-alone floor model, available for expanded functionality.

STERIS INNOWAVE™ ECO ULTRASONIC CLEANER

The **Steris InnoWave™ ECO Ultrasonic Cleaner** offers a powerful and space-saving solution for cleaning small surgical instruments. Utilizing sonic cavitation technology, this stainless-steel cleaner generates miniature vacuum bubbles that implode on instrument surfaces, effectively scrubbing away challenging soils and reaching intricate crevices and lumens. Designed for consistent cleaning performance throughout its 5.3-gallon chamber, the InnoWave ECO also supports compliance with customizable cleaning cycles and digital download of up to 10,000 cycles for audit purposes. Its user-friendly design features an intuitive control panel for monitoring time and temperature, and its plug-and-play functionality eliminates the need for a drain or waterline, making it a convenient tabletop addition to any facility.

SHARPERTEK STM 1100 MANUAL FILL/DRAIN 40KHZ ULTRASONIC CLEANER

The **SharperTek STM-1100** is an advanced tabletop ultrasonic cleaner specifically designed for the meticulous cleaning of medical instruments. This single-tank unit employs ultrasonic energy at a frequency of 40kHz in conjunction with a detergent solution to ensure thorough cleansing. It features a manual fill and drain system and includes an ID flush tray for the effective cleaning of cannulated instruments. Built with robust type 304 stainless steel exterior panels and a type 316L stainless steel sonic cleaning chamber, the STM-1100 offers enhanced corrosion resistance. Its automated controls and HMI display, governed by a Programmable Logic Controller (PLC), allow for precise control over adjustable parameters and automated functions. Safety is prioritized with liquid level sensors to prevent overheating and ensure optimal cleaning conditions, alongside overflow protection. The unit is equipped with an automatic cycle timer and solution heater, maintaining the tank's solution at a pre-set temperature. Adhering to various standards, including UL 61010A-1 and OSHA noise emissions, the STM-1100 is a reliable choice for medical facilities. It comes with a standard instrument basket, SteraZine detergent, and SDL Verify Software, with optional upgrades for robotic instrument flush trays.

STERIS INNOWAVE UNITY 15 ULTRASONIC IRRIGATOR

The **Steris InnoWave Unity 15 Ultrasonic Irrigator** is an advanced, freestanding ultrasonic cleaner meticulously engineered to address the rigorous demands of modern healthcare facilities. Capable of processing up to 16 lumened devices or 25 lbs. of non-lumened surgical instruments per cycle, it ensures thorough and efficient cleaning. The InnoWave Unity employs a systematic ultrasonic cleaning process that effectively removes exterior soils from crevices and irregular surfaces using targeted sonic activity. It also dislodges and flushes soils from complex lumens through sonic irrigation, ensuring consistent cleaning results across the entire ultrasonic cleaning tank with its unique wave-shaped cavitation pattern. The device enhances operational efficiency by automating and precisely delivering cleaning chemistry, while its user-friendly control panel provides clear visibility of time and water temperature. Additionally, the flexibility to adjust cleaning parameters with custom cycles according to device Instructions for Use (IFU) and the ability to download up to 10,000 cycles via a USB drive make the InnoWave Unity a reliable and indispensable tool for healthcare facilities aiming to maintain impeccable

hygiene standards and be prepared for audits.

SHARPERTEK STM 1500 AUTO FILLDRAIN 40KHZ ULTRASONIC CLEANER

The **SharperTek Model STM-1500** is a robust and sophisticated tabletop ultrasonic cleaner specifically designed for the effective cleaning of medical instruments. This single-tank unit features a durable stainless steel construction with type 304 polished exterior panels and a type 316L mirror finish stainless steel sonic cleaning chamber, ensuring high corrosion resistance and longevity. Equipped with a touchscreen control and a Programmable Logic Controller (PLC), the STM-1500 offers precise control over various adjustable parameters and automated functions such as automatic fill, drain, rinse, and cycle start and stop. It also includes advanced features like UV light and ozone treatment options, pressure air blow-off for cannulated instruments, and automatic detergent dosing, enhancing its cleaning effectiveness. Safety and compliance are paramount, with adherence to standards such as UL 61010A-1, OSHA, FCC, and AAMI guidelines. The STM-1500's compact design does not compromise its capacity, accommodating a 10-gallon liquid volume and a maximum load of 35 pounds, making it an ideal choice for healthcare facilities prioritizing hygiene and efficiency in instrument reprocessing.

DURASONIC 3L TABLETOP ULTRASONIC CLEANER

The Durasonic 3L Tabletop Ultrasonic Cleaner is a compact yet powerful device designed for the efficient and thorough cleaning of small to medium-sized items. This cleaner utilizes high-frequency sound waves to create microscopic bubbles in a cleaning solution, which then implode, generating a powerful cleaning action that penetrates even the hardest-to-reach areas and removes dirt, grease, and grime without damaging the items being cleaned. Its 3-liter capacity makes it an ideal choice for a variety of applications, including jewelry, optical parts, dental and surgical instruments, and electronic equipment. The Durasonic 3L model is appreciated for its simple operation, featuring intuitive controls for setting the timer and temperature, making it accessible for both professional and home use. With its robust construction and effectiveness, it stands as a valuable tool for anyone in need of a reliable and efficient cleaning solution.

STERIS CAVIWAVE PRO CLEANER AND DRYER CHAMBER 17 GAL ULTRASONIC CLEANER

The **Steris Caviwave Pro Cleaner and Dryer Chamber 17 GAL Ultrasonic Cleaner** is a high-performance cleaning system designed for efficient and thorough cleaning of delicate instruments. With a cleaning frequency of 132kHz, it surpasses the commonly used 40kHz, ensuring a superior ultrasonic cleaning experience. Powered by 2000 watts of sonic power, this unit offers a robust solution for maintaining the cleanliness of sophisticated medical instruments, such as the Da Vinci Xi instrument Tray and Endowrist Instruments. Featuring a user-friendly toe touch cycle start and automatic chemistry injection, the Caviwave Pro simplifies the cleaning process while ensuring precision. Its 17-gallon tank can accommodate up to 35 pounds of instruments, making it ideal for high-volume use. The unit also includes flush ports for effective cleaning of internal passages and offers multiple configurations for cleaning, flushing, lubricating, and drying. Designed with practicality in mind, the unit supports varied electrical specifications and features both gravity and pump drainage options. With its comprehensive capabilities and advanced technology, the Steris Caviwave Pro stands out as a reliable choice for healthcare facilities seeking top-tier instrument care.

STERIS CAVIWAVE PRO SINGLE CHAMBER 17 GAL ULTRASONIC CLEANER

The **Steris Caviwave Pro Single Chamber 17 GAL Ultrasonic Cleaner** is a state-of-the-art cleaning solution designed for the meticulous care of delicate instruments. With a remarkable cleaning frequency of 132kHz, it significantly surpasses the standard 40kHz used by most ultrasonic cleaners, ensuring a deeper and more thorough clean. It boasts a robust sonic power of 2000 watts, making it ideal for handling heavy-duty cleaning tasks. The convenience of a toe touch cycle start, coupled with automatic chemistry injection, streamlines the cleaning process, reducing manual intervention. Depending on the unit configuration, the cleaner can automatically clean, flush, lubricate, and dry instruments, making it a versatile addition to any facility. Flush ports are strategically incorporated to allow the tank solution to penetrate internal passages effectively. **The 17-gallon tank can accommodate up to 35 pounds of instruments, including specialized trays like the Da Vinci Xi instrument Tray CRP1723 and Da Vinci® Single Site® and Endowrist® Instruments (CRP1717)**. The unit's electrical specifications cater to various setups, supporting both single and three-phase connections. Efficient drainage is ensured through gravity and pump systems, with maximum flow rates of 10 and 20 gpm, respectively, accommodating water temperatures up to 120°F. The cleaner's design, with dimensions of 43-1/2 x 42-1/4 ± 1 x 36 inches, requires a minimum service access clearance of 24 inches on all sides, emphasizing the need for ample space for optimal operation and maintenance.

STERIS CAVIWAVE RINSING AND DRYING ULTRASONIC CLEANER

The refurbished **Steris Caviwave Rinsing and Drying Ultrasonic Cleaner** is a state-of-the-art cleaning system designed to deliver superior performance in medical and laboratory settings. Operating at a cleaning frequency of 132kHz, it significantly surpasses the standard 40kHz frequency, ensuring thorough and efficient cleaning of instruments. This advanced system features a convenient toe touch cycle start and automatic chemistry injection, streamlining the cleaning process. Depending on the unit's configuration, it can automatically clean, flush, lubricate, and dry instruments, making it versatile for various applications. The system is equipped with a **15-gallon (57 L) tank** capable of holding up to 22 pounds (10 kg) of instruments, and its approximate operating weight is 1311 pounds (595 kg). It requires a 208 V, 50/60 Hz, 3-phase (5 wire) electrical connection and is compatible with hot and cold water inputs. The overall dimensions of this fully equipped console model are 39-1/2 x 42-1/4 ± 1 x 60 inches (1003 x 1073 ± 25 x 1524 mm), with a minimum service access clearance of 24 inches (610 mm) on all sides, ensuring easy maintenance and operation.
