ULTRASOUND MACHINES

Auxo Medical understands the importance a durable ultrasound machine can make in meeting the diagnostic needs of your physicians and patients. Auxo Medical carries refurbished ultrasound machines some the most trusted brands, including GE, Mindray, Philips and Edan.

Fortunately, our devices offer durability and superb value to fit any budget. Available in a wide variety of sizes and features, including cart mounted or hand held units. In addition, Auxo Medical has ultrasound machines that can cover the widest range of applications. Many of our models feature the latest innovative technology for superb image quality across a variety of diagnostic applications. Additionally, this includes abdominal, OB/GYN, vascular, biopsy, cardiac, pediatric, and more. Ultimately, whether your facility is looking for portability, color imaging, or extended battery life. Auxo Medical has a cost-effective ultrasound machine option ready to improve your medical practice.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

MINDRAY VETUS M10 WITH 2 PROBES

The **Mindray Vetus M10** is a portable, veterinary-specific ultrasound system designed for versatile and high-quality imaging in both clinical and field environments. It features a lightweight design with a 15.6-inch LED monitor, robust 256GB SSD for data storage, and advanced imaging technologies like Smart B-Line and iWorks breed-specific protocols, which enhance image clarity and diagnostic confidence. Equipped with intuitive controls, veterinary presets, and a broad range of compatible probes (including the two probes included), the Vetus M10 streamlines workflow for abdominal, cardiac, musculoskeletal, and reproductive examinations across various animal species. Its long battery life and ergonomic portability make it suitable for in-clinic and on-location diagnostics, ensuring veterinary professionals can deliver accurate, confident diagnoses anywhere. Included with purchase are onboard training tools, virtual training sessions with a registered sonographer, and a comprehensive 5-year warranty for added peace of mind.

Siemens 9L4 Linear Array Transducer

SIEMENS 9L4 LINEAR ARRAY TRANSDUCER

The **Siemens 9L4 Linear Array Transducer** is a high-frequency ultrasound probe designed for detailed imaging in various clinical applications. Its linear array form factor makes it ideal for superficial imaging of the breast, vascular, abdominal, and musculoskeletal structures. Operating within a frequency range of 4.0 to 9.0 MHz, it provides high-resolution images suitable for precise diagnostics. Compatibility is limited to the **Siemens Acuson S3000** ultrasound system, ensuring seamless integration for advanced imaging in medical practices.

EDAN U50 PRIME ULTRASOUND

The **Edan U50 Prime Ultrasound** is a versatile, high-performance imaging device designed for a wide range of medical applications including abdomen, obstetrics, gynecology, urology, small parts, orthopedics, cardiology, and peripheral vessels. Featuring a high-resolution LED screen, it offers exceptional image clarity while maintaining a lightweight design for easy mobility within clinical environments. The system comes with a large capacity integrated hard drive for storing scans and data, and supports advanced imaging techniques such as Color Doppler, Power Doppler, and Pulse Wave Doppler. It incorporates cutting-edge technologies like Multi-Beam-Forming (mBeam), Beam-Forming Optimization (BFO), Phased Inversion Harmonic Compound Imaging (EHCI), and Speckle Resistance (eClear) for superior image quality. The device offers multi-frequency broadband transducer options, multi-pseudo-color displays, and multi-language software packages to suit diverse clinical needs. Additional features include an optional built-in rechargeable Li-ion battery, DICOM 3.0 compatibility, footswitch, mobile trolley, carrying case, and needle-guided brackets, making the Edan U50 Prime a flexible and reliable tool for comprehensive ultrasound imaging.

GE VOLUSON E8 BT16 ULTRASOUND SYSTEM OB/GYN PACKAGE

The **GE Voluson E8 BT16 Ultrasound System OB/GYN Package** is a state-of-the-art imaging solution designed to deliver exceptional clarity and precision in obstetrics and gynecology diagnostics. Featuring advanced 4D imaging capabilities, high-resolution probes, and intelligent workflow tools, this system provides detailed visualization of fetal development, uterine structures, and ovarian conditions with remarkable accuracy. Its ergonomic design and user-friendly interface enhance workflow efficiency, while integrated image management and reporting tools streamline documentation. The OB/GYN package includes specialized transducers optimized for obstetric and gynecological exams, ensuring comprehensive assessment capabilities. Built for reliability and clinical excellence, the GE Voluson E8 BT16 empowers healthcare providers to deliver confident diagnoses and improved patient outcomes in obstetric and gynecological care.

EDAN DUS 60 B&W DIGITAL ULTRASOUND

The E**dan DUS 60 B&W Digital Ultrasound** is a cutting-edge diagnostic tool, renowned for its innovative technologies that enhance imaging quality and user experience. It features phase-inversion harmonic compound imaging, which significantly improves contrast resolution, making it ideal for a variety of medical applications. The inclusion of speckle reduction technology further refines image quality by improving contrast resolution while maintaining detail, essential for accurate diagnoses. Its multi-beam technology, coupled with synthetic aperture, dynamic receive focusing, dynamic frequency scanning, and dynamic apodization, ensures superior image clarity and precision. The multi-frequency transducer technology enhances transducer utility across multiple frequencies, although probes are not included. The ultrasound system is designed with a user-friendly workflow in mind, featuring an intuitive control panel that reduces the learning curve for medical professionals. It supports a wide range of applications, including abdomen, obstetrics, gynecology, endovaginal, small parts, musculoskeletal, vascular, urology, endorectal, cardiology, and pediatrics. With its compact and lightweight design, the device offers two hours of battery-powered operation, a 12.1" TFT-LCD monitor, and multiple peripheral ports, making it a versatile and portable choice for healthcare settings.

MINDRAY TE5 ULTRASOUND (WITH 1 PROBE)

The **Mindray TE5 Ultrasound** system stands out as a specialty device meticulously designed to cater to the rigorous demands of contemporary ultrasound environments. This system offers enhanced image quality and an intuitive touch-enabled interface, making it versatile for a wide array of clinical applications. Among its standout features is the eSpacial Navi™ technology, a 4D magnetic needle navigation system that significantly improves needle visualization and localization during procedures, thereby boosting physician confidence and patient safety. The system also incorporates the second-generation iNeedle+™ technology, which automatically detects the needle angle to enhance visibility on both linear and convex transducers. Additionally, the iVocal technology leverages artificial intelligence for voice recognition, providing a hands-free scanning experience, which is particularly useful in sterile environments. The TE5 is equipped with a 15-inch seamless touch screen, a 128GB solid-state hard disk, and advanced imaging features such as iBeam™, iClear™, and PSH™. With comprehensive connectivity options, including network ports, HDMI output, and USB 3.0 ports, along with a built-in lithium-ion battery and wireless adapter, the TE5 system ensures both functionality and portability. It is further complemented by a mobile stand and a choice of one probe, underscoring its adaptability and user-centric design.

CHISON SONOAIR 70 WITH ONE STANDARD TRANSDUCER AND TROLLEY

The **Chison SonoAir 70** was designed with advanced imaging technology to provide superior clarity for every scan. Its high-resolution imaging capabilities ensures that healthcare providers can make accurate diagnoses quickly. The Chison SonoAir 70’s ergonomic structure is both lightweight and portable, making for effortless transportation between rooms or clinics and ideal for medical practices of all sizes. Its intuitive user interface and customizable settings makes for a personalized experience and allows for efficient optimization. With its advanced features, ergonomic design, intuitive operation, and comprehensive range of applications, this system ensures that you’ll have the right tools at your disposal for every diagnostic challenge.

CODONICS 810-DVB DIRECTVISTA BLUE FILM 8X10 500 SHEETS

The **Codonics 810-DVB DirectVista Blue Film** is a specialized medical imaging film designed for high-quality diagnostic purposes. Packaged conveniently in a box containing 500 sheets, each measuring 8 inches by 10 inches, this product ensures ample supply for continuous usage in demanding medical environments. The 810-DVB model is specifically engineered to produce crisp, clear, and detailed images essential for accurate diagnostics. This blue film is compatible with a range of medical imaging equipment, making it a versatile choice for healthcare facilities focused on delivering precision in diagnostic imaging. Its size and quantity make it particularly suitable for clinics and hospitals looking to maintain a steady workflow in radiography departments.

CODONICS HORIZON GS MULTI-MEDIA IMAGE PRINTER

The **Codonics Horizon GS Multi-Media Image Printer** stands out as a versatile and compact solution for medical imaging needs, adaptable to various healthcare settings. This high-performance device supports a range of media types, including color and grayscale paper as well as blue and clear film, making it highly suitable for producing diagnostic images, such as X-rays, MRI scans, and ultrasound images. Its speed and efficiency ensure that medical professionals can quickly access high-quality prints for review, consultation, or patient records. Furthermore, the Horizon GS is renowned for its reliability and ease of use, featuring intuitive interfaces and seamless integration with existing hospital imaging systems. This combination of versatility, efficiency, and user-friendliness makes the Codonics Horizon GS an invaluable tool in enhancing the quality of patient care and optimizing workflow in medical facilities.

SONY UPP210HD EQUIVALENT THERMAL PAPER [ULSTAR-2100HD] (5 ROLLS/BOX)

Manufactured by Durico, a well-regarded producer of high-quality medical imaging supplies, this thermal paper ensures sharp, clear images that are crucial for accurate diagnostics. Each roll is formulated to produce high-definition prints, capturing intricate details necessary for medical analysis. The paper's enhanced sensitivity allows for consistent print quality, making it a reliable choice for healthcare professionals who require precise and durable medical images. Additionally, the use of this specific equivalent to Sony's original product guarantees that the printer warranty remains intact, while also offering a cost-effective alternative without compromising on quality or performance.

SONY WIRELESS PRINT SYSTEM UPA-WU10

The **Sony UPA-WU10 Wireless Print System** allows cable-free connection of compatible Sony medical printers with compatible surgical endoscopes, ultrasound systems, and other hospital imaging modalities.* The system effectively replaces a conventional wired USB connection between printer and imaging modality. It’s ideal for busy clinical environments, where modalities are constantly being moved between different O.R. and treatment rooms. The all-in-one wireless print solution also resolves the problem of limited space on medical carts, allowing connection between the modality and an “off-cart” printer without a lengthy USB cable.

SIEMENS ACUSON DAX PROBE

The **Siemens ACUSON DAX Probe** represents a significant advancement in ultrasound technology, integrating cutting-edge InTune technology that includes gesture detection for seamless operation. It is equipped with a compact-pinless connector and Multi-D technology, ensuring robust connectivity and versatile functionality. Notably, the probe offers exceptional penetration up to 40 cm, making it suitable for a comprehensive range of clinical applications including abdominal, fetal, and pediatric imaging. Additionally, the ACUSON DAX Probe is designed with a reduced push force feature, enhancing comfort and efficiency, particularly when dealing with technically difficult patients who have a limited imaging window. This combination of advanced technological features and user-centric design makes it an invaluable tool in medical diagnostics, improving both the experience and the outcomes of ultrasound examinations.

SIEMENS ACUSON SEQUOIA ULTRASOUND SYSTEM

The **ACUSON Sequoia™ ultrasound system**, a pioneering achievement in medical imaging technology, has consistently set industry benchmarks with its superior image quality, color sensitivity, and advanced imaging modes. The original model's immense popularity has only been eclipsed by its latest iteration, which introduces groundbreaking enhancements that elevate diagnostic capabilities to new heights. The new ACUSON Sequoia integrates unique and patented technologies designed to virtually eliminate color flash artifacts and achieve deeper tissue penetration compared to conventional systems. It also offers extended viewing times for contrast agents, providing clinicians with invaluable extra time to identify additional incidental lesions, thereby enhancing diagnostic accuracy and patient outcomes. Developed through extensive collaboration involving 170 workshops with 365 ultrasound users worldwide, the system is finely tuned to meet the practical needs and preferences of its operators, ensuring ease of use and reduced variability in patient care. The introduction of the new BioAcoustic™ Imaging Technology further refines the system's ability to track ultrasound signals with exceptional precision, making the ACUSON Sequoia an indispensable tool across a wide range of clinical applications including abdominal, OB-GYN, musculoskeletal, cardiac, vascular, urology, and small parts imaging. The system's thoughtful design, complemented by a suite of high-tech probes and wireless capability, underscores its status as a leader in the

evolution of ultrasound technology, tailored by and for medical professionals to advance patient care.

MINDRAY DP-50 EXPERT ULTRASOUND WITH 2 PROBES

The Mindray DP-50 Expert Ultrasound stands out in the medical imaging field with its advanced features designed to enhance diagnostic accuracy and streamline workflows. At the core of its technology is Purified Harmonic Imaging, which significantly improves contrast resolution, delivering clearer images with less noise and sharper, continuous edges. Its iBeam™ function leverages multiple scanning angles to form a single, more detailed image, while iClear™ technology automatically detects structures to boost image clarity, ensuring smoother tissues and cleaner 'no echo' areas. The system's Multi-Beam Formation technology allows for up to four times the tasking for each transmitted beam, enhancing time resolution and frame rate. For convenience, the iStorage™ feature enables the direct transfer of images and reports to a PC via a network cable, and iZoom™ offers an instant full-screen view at the click of a button. The iStation™ facilitates efficient patient information management, and iTouch™ provides instant auto image optimization in B mode. Designed with user experience in mind, the DP-50 Expert features a sleek, streamlined shape, a user-friendly keyboard, and controls, plus a lightweight system for increased mobility. The high-resolution, wide-angle 15” LCD with tilt functionality ensures optimal viewing angles. Each unit comes with two probes of the customer's choice, making it a versatile and powerful tool for a wide range of diagnostic applications.

MINDRAY MX7 ULTRASOUND CART ONLY

The **Mindray MX7 Ultrasound Cart** is an innovative solution designed to enhance the flexibility and efficiency of diagnostic procedures in various healthcare settings. Engineered with the user in mind, this cart is an epitome of ergonomic design and mobility, allowing healthcare professionals to bring high-quality ultrasound imaging directly to the patient's bedside or to any location within a medical facility where it's needed. The MX7 cart is built to accommodate the Mindray MX7 ultrasound system securely, providing easy access and stable support for the device. Its thoughtful design includes features such as adjustable height settings, ample storage for probes and accessories, and smooth-rolling casters for effortless maneuverability. By providing a dedicated, mobile platform for the MX7 ultrasound system, the Mindray MX7 Ultrasound Cart Only enhances workflow, improves patient care, and optimizes the use of ultrasound technology in a wide array of clinical environments.

MINDRAY ZONARE S3 ULTRASOUND

Powered by our industry-leading virtual beamformer and image processing technology, ZONE Sonography® Technology+ (ZST+) allows the acquisition and processing of large zones of data 10 times faster than traditional architectures. This provides uniform and detailed high-resolution images with reduced motion artifact and a precise display of hemodynamics.

Timely answers and exceptional patient care are more important now than ever before. The ZS3 System’s advanced capabilities, like Contrast Enhanced Ultrasound (CEUS) and Elastography tools, may provide additional information needed for confident decision making.

An intuitive and easy-to-use interface streamlines workflows, helps reduce keystrokes, and improves exam efficiency.

Includes: 1 C6-2 convex probe

SONOSITE S-ICU W/ PROBE AND STAND

The **S-ICU** is part of Sonosite's S-series of ultrasound machines which all share similar characteristics, form factors, and appearance but are designed for various areas in a hospital. For example, S-Cath is intended for radiology, and S-Fast is made for ERs.

The S-ICU ultrasound machine is budget-friendly, has excellent image quality, has intuitive walk-up usability. They are fast ultrasound machines perfect for critical care environments.

Technical Specs: 10.4″ LCD, Weight: 8.5 lbs (3.8 kg), Dimensions: 15.1″ H x 11.6″ W x 6.1″ D / 38.4 cm H x 29.5 cm W x 15.5 cm D, The Sonosite S-ICU is an easy-to-use ultrasound system designed specifically for the demanding environment of the intensive care units (ICUs) in hospitals. It is available with a traditional cart with lock-out wheels or a wall-mount version with a convenient swivel/articulating arm.

PHILIPS EPIQ 7C ULTRASOUND WITH 2 PROBES

Philips nSIGHT Imaging is a totally new approach
The Philips proprietary nSIGHT Imaging architecture introduces a totally new approach to forming ultrasound images. Unlike conventional systems that form the image line by line, nSIGHT creates images with superb resolution down to the pixel level.

Extraordinary architecture
nSIGHT Imaging incorporates a custom multi-stage precision beamformer along with massive parallel processing. This proprietary architecture captures an enormous amount of acoustic data from each transmit operation and performs digital beam reconstruction along with mathematically optimized focal processing to create real-time images with exceptional resolution and uniformity.

xMATRIX is our most leading- edge, versatile ultrasound transducer technology
No other premium ultrasound system can run the complete suite of the world’s most innovative ultrasound transducers. With the touch of a button, xMATRIX offers all modes in a single transducer: 2D, M-mode, color Doppler, Doppler, iRotate, Live xPlane, Live 3D, Live 3D Zoom, and Live 3D Full Volume.

GE VIVID E9 XD CLEAR 2 PROBES CUSTOMERS CHOICE

Vivid E9 is GE Healthcare’s first cardiovascular ultrasound system built specifically for 4D imaging—from ergonomics to image acquisition to data management. Available in both 2D and 4D configurations. Featuring our Accelerated Volume Architecture 4D platform for increased processing power compared to GE Healthcare’s previous 4D scanner. Advanced quantification tools help streamline workflow for enhanced productivity. These tools include 4D Stress and 4D Auto LV Quantification. One-touch ease of use and intuitive workflow puts 4D at your fingertips. As 4D becomes routine in your clinical practice, you still need excellent 2D image quality. Vivid E9 handles 2D imaging with equal power, precision, and agility, made possible with our 4V-D transducer, the second-generation 4D transducer, and the M5S/M5Sc transducers single-crystal matrix array and XDclear transducer technology. Open the door to 4D and its many new possibilities.

PHILIPS 70 G ULTRASOUND WITH 2 PROBES OF CUSTOMER'S CHOICE

The **Philips Affiniti 70** is the successor to Philips' popular HD15 shared service color Doppler ultrasound machine. It's designed as a "budget" shared service ultrasound, and includes an architecture based on its premium EPIQ series of ultrasound machines, offering some of its best technology to those with tighter budgets.

With regards to ultrasound probes, the Philips Affiniti 70 ultrasound supports a wide range of small, lightweight transducers. As a complete shared service ultrasound, it has 4D obstetric imaging, ShearWave elastography, and provides both adult and pediatric echocardiography (including TEE) and stress echo.

The Affiniti 70 ultrasound is also designed to help you work more comfortably and efficiently. With a 21.5″ articulating fold-down LCD screen and touchscreen tablet-like user interface, the Affiniti 70 has a simplified user interface for "walk-up" usability, helping make it ideal for busy offices with multiple users.

GE LOGIQ S8 R2 W/ 2 PROBE OF CUSTOMERS CHOICE

The LOGIQ® S8 provides easy-to-use tools that help busy departments and practices improve workflow while securing exam consistency. All of that in a streamlined and innovative design, ensuring exceptional user comfort.

With a fully adjustable console and flat-screen, a very compact design and incredible scanning comfort,the LOGIQ® S8 follows the Society of Diagnostic Medical Sonographers (SDMS) guidelines.

With the LOGIQ® S8, moving your ultrasound system around is easier than ever before. Four active pinless ports and one parking slot improve your flexibility in moving through a wide range of clinical applications. Probe holders on both sides of the operating panel and light-weight cables keep the needed transducers available at your fingertips.
You can easily customize the system settings and commands using the large configurable touchscreen.

SONOSITE S II ULTRASOUND WITH STAND AND 2 PROBES

The **FujiFilm Sonosite S II Ultrasound with stand and two probes** is a versatile and efficient imaging solution designed to enhance clinical productivity and adapt seamlessly to various hospital environments. Its intuitive touchscreen interface, complemented by physical knobs, facilitates easy control over gain and depth, while the flexible management of caliper, zoom, and color box through a virtual trackpad or touchscreen caters to diverse procedural needs. The system's ability to switch exam types or transducers with just two touches, thanks to its embedded dual transducer connector, further streamlines operations. Offering advanced imaging capabilities with Continuous Wave and Pulsed Wave Doppler, the Sonosite SII ensures sharper imaging results. Its compact design, allowing for a zero footprint option, is ideal for space-constrained areas, and its operation with a sterile drape makes it suitable for sterile environments. The ultrasound system comes equipped with ample storage, including a lockable drawer with a tray, and features such as 2D Greyscale/Color Doppler, CPD, M-Mode, DICOM, PW Tissue Harmonics, and Clips HD. The package includes a user manual and two transducers: HFL38xi for Popliteal Artery imaging with Doppler and rC60xi for Abdominal Right Upper Quadrant examinations, along with a convenient trolley for mobility.

PHILIPS EPIQ 5G ULTRASOUND WITH 2 PROBES

The refurbished Philips Epiq 5 is a premium shared service ultrasound machine from Philips. It offers PureWave single crystal probes, superior ergonomics, and workflow, all in a compact and lightweight design. The Epiq 5 for sale replaces the older Philips iU22 and offers less probe options and features than the Epiq 7, which is higher priced. All Epiq and Affiniti ultrasound machines have a similar layout and use the same monitor and expansive tablet-like touchscreen for navigation.

CHISON SONOBOOK 6 WITH 2 PROBES

The new Chison SonoBook 6 portable shared service ultrasound machine is a laptop-style ultrasound machine designed for the Point of Care market and mobile applications.

The SonoBook 6 is similar in image quality and features to the Chison EBit 50, but also has CW Doppler for cardiac imaging. Its design makes it more ideal for the bedside ultrasound market (Point of Care) with its solid alloy casing and smaller, lightweight design.

It has advanced features such as Compound Imaging, Speckle Reduction Imaging, SuperNeedle (Needle Visualization), Elastography, AutoIMT, Tissue Doppler, HIP Graph, and full DICOM with Structured Reporting. Its internal battery allows for up to 2 hours of scan time.
