HALLOWELL 2024 PRO VETERINARY ANESTHESIA VENTILATOR

The **Hallowell 2024 PRO Veterinary Anesthesia Ventilator** is a compact, reliable, and versatile pressure-limited, time-cycled ventilator specifically designed for small animal anesthesia. It delivers precise, controlled mechanical ventilation with adjustable tidal volume, breath rate, and inspiratory pressure relief, ensuring safe support across a wide range of small animal cases. Features like manual breath control, audible alarms for overpressure or circuit issues, and a visible breath indicator enhance clinician confidence and patient safety. Its compatibility with most anesthesia circuits, along with a durable, space-saving design, makes the 2024 PRO an ideal solution for general, specialty, emergency, and teaching veterinary practices seeking dependable ventilation tailored to small animal patients.

VOCSN PRO ROLL STAND

The **VOCSN Pro Roll Stand** is a purpose-built mobility solution designed exclusively for the VOCSN respiratory system, enabling safe and efficient transport of this comprehensive ventilator across hospitals, long-term care facilities, and home care environments. Crafted with a durable, low-center-of-gravity five-spoke base and lockable chrome casters with 3-inch hard rubber wheels, the stand provides excellent stability and effortless maneuverability on most floor surfaces, while ensuring it stays securely in place during patient care. It features a secure, tool-free docking system with a precise T-slot for stable attachment of the VOCSN ventilator (sold separately), along with a built-in utility basket and integrated handle for organization and control. Versatile mounting points allow attachment of accessory arms, IV stands, or feeding pumps, creating a customizable care station, while dedicated shelves and brackets securely store the AC power supply, heater/humidifier units, and oxygen cylinders—up to two—making it the ideal solution for portable, reliable respiratory support in various care settings.

OEM Part Number: VENPRT-00569-001 | 24 Month Warranty

VENTEC LIFE SYSTEMS VOCSN V+PRO TRANSPORT VENTILATOR

The **Ventec Life Systems VOCSN V+Pro Transport Ventilator** is a versatile, all-in-one respiratory support device designed for hospital, transport, and home environments. Combining five essential therapies—ventilation (both invasive and non-invasive), oxygen concentration (internal, equivalent to 6 L/min), cough assist (Touch Button Cough™), suction (hospital-grade), and high-performance nebulization—VOCSN offers comprehensive respiratory management in one compact, lightweight unit. Weighing approximately 70% less and smaller than five separate devices, it provides up to 9 hours of onboard battery life and features an intuitive 7-inch color LCD touchscreen for quick setup and easy operation. Built for safety and efficiency, VOCSN delivers uninterrupted therapy with seamless switching between modes, reducing the risk of circuit misconnects, and supports scaling to individual patient needs—making it ideal for adult and pediatric patients over 5 kg.

Its advanced VOCSN Multi-View system enables complete trending and monitoring across multiple therapies, ensuring precise patient management and safety during transport and in critical care settings.

VENTWAY SPARROW - EMS AND TRANSPORT TURBINE VENTILATOR

The **Ventway Sparrow** is a compact, impact-resistant emergency and transport ventilator designed for field and combat medicine, enabling effective ventilation from the point of injury to the ICU with a single, portable device. It supports multiple ventilation modes, including SIMV-VC-PS, SIMV-PC, CPAP, HFNC, and CPR mode, and is suitable for adult and pediatric patients over 5 kg. Key performance specs include a wide respiratory rate range (1–60 bpm), peak inspiratory pressure up to 60 cm H2O, tidal volumes from 50–2000 mL, adjustable inspiratory time and I:E ratios, high peak flow for both mandatory and spontaneous breaths, FiO2 from 21% to 95%, and PEEP from 0 to 20 cm H2O. The device is operable across altitudes from -1200 ft to 25,000 ft and supports battery power (rechargeable 2850 mAh and non-rechargeable 3000 mAh), plus external AC/DC and DC-DC power adapters. Each package includes battery(s), a filter, and an AC/DC power adapter. This portable, user-friendly ventilator is designed to deliver reliable respiratory support in austere environments where space and weight are at a premium.

PHILIPS RESPIRONICS V60 PLUS

The **Philips Respironics V60 Plus** is a microprocessor-controlled ventilator providing bi-level, positive air ventilation for both non-invasive (NIV) and invasive spontaneous breathing support. It offers two ventilation therapy options: Non-Invasive Ventilation (NIV) and High Flow Therapy (HFT). The V60 Plus includes advanced features such as AVAPS (Average Volume Assured Pressure Support) to monitor tidal volume in a pressure-limited mode, PCV (Pressure Control Ventilation) for patients with reduced lung capacity, and CPAP (Continuous Positive Airway Pressure) to provide continuous pressure throughout the respiratory cycle. Suitable for both pediatric and adult patients, it incorporates Philips auto-tracking technology for therapy adjustments without machine changes. The ventilator features a user-friendly touchscreen display and a 6-hour internal battery, enabling intra-hospital transport. Additional capabilities include high-resolution graphics for waveform interpretation, standby mode for patient-clinician interaction, data communication for hospital connectivity, and Respi-Link for remote diagnostics and upgrades. CPAP with C-Flex offers flow-based expiratory pressure relief for improved comfort, while PCV provides greater control over the patient's breathing pattern. The package includes a battery and stand, with light assembly potentially required.

PRECISION MEDICAL EASYGOVAC ASPIRATOR (PM65)

The **Precision Medical EasyGoVac Aspirator (PM65)** is a portable, battery-powered suction unit designed for use in hospitals, nursing homes, ambulances, and homecare settings. It comes equipped with a hospital-grade power cord, carry bag, DC power cord, charger, and canister. The EasyGoVac delivers continuous suction power, producing vacuum up to 483 mmHg, and its high-performance battery provides over 2 hours of runtime. User-friendly features include a low battery light and an easy-to-clean, closed design that guards against bacterial growth. Safety features, such as an overflow prevention system, are incorporated into the pump to prevent contamination. The unit weighs 9.6 lbs (4.4 kg) and includes a replaceable inline hydrophobic bacteria filter and an 800cc disposable suction canister with a float shut-off.

PHILIPS TRILOGY 202 VENTILATOR

The **Philips Trilogy 202 Ventilator** is an advanced, dual-mode device offering both volume-control and pressure-control ventilation for a range of patient needs, whether invasive or noninvasive. Its versatile breath delivery system and flexible setup options eliminate the need for frequent equipment changes, ensuring seamless and continuous patient care. One of its standout features is its ability to compensate for leaks in both pressure and volume control modes, which allows for the use of simpler passive circuits, potentially saving significant time and costs. The Trilogy 202 is also designed for intra-hospital transport, equipped with a 3-hour internal battery and an optional 3-hour detachable battery, and weighs only 5.6 kg, making it highly portable. Its integrated carrying handle adds to the convenience, ensuring safe and easy transport across hospital settings. For patients transitioning from hospital to home care, the Trilogy 202 offers a consistent user interface and identical ventilation modes and breathing circuit configurations, ensuring continuity of care. The ventilator also provides leak-compensated volume modes, enabling consistent tidal volume delivery even with non-invasive ventilation or cuff leaks. Setup is straightforward, with a color screen and intuitive menu navigation, and the integrated blender allows for oxygen administration from 21% to 100%. Additionally, the device supports two different treatment prescriptions, accommodating patients who may require different ventilation settings during the day and night. Detailed data storage on a secure digital (SD) card enables comprehensive review of treatment trends, breath-by-breath waveforms, and usage patterns through DirectView software, making the Trilogy 202 a robust and versatile tool for both acute and chronic care environments.

DRÄGER EVITA XL VENTILATOR

The **Dräger Evita XL Ventilator** is a sophisticated and versatile piece of medical equipment designed to provide advanced respiratory support for critically ill patients. Integrating state-of-the-art technology, it offers a wide range of ventilation modes to accommodate various patient needs, from neonatal to adult care. The intuitive user interface and customizable settings enhance ease of use for healthcare professionals, enabling precise control over ventilation parameters. Additionally, the Evita XL is equipped with advanced monitoring capabilities, ensuring real-time analysis and optimization of patient respiratory status. Its robust design, coupled with reliable performance, makes the Dräger Evita XL an indispensable asset in intensive care units and other critical care environments.

PURITAN BENNETT 560 VENTILATOR

The **Puritan Bennett™ 560 portable ventilator** empowers patients to live with greater independence while offering clinicians the reassurance of a reliable and trusted system. This compact and lightweight device, weighing just 4.5 kg, operates quietly at less than 30 dBA at 1 meter, making it suitable for both hospital and home environments. Its internal lithium-ion battery provides up to 11 hours of operation, with a real-time battery use time indicator displaying the remaining hours and minutes, ensuring continuous support. The ventilator's USB memory device facilitates seamless data transfer from home to clinical settings, enhancing patient care. Additionally, ventilator parameters and alarm settings are linked to mitigate the risk of inappropriate configurations. With oxygen enrichment capabilities using a low flow source and an integrated measurement kit to monitor FiO2 levels, the Puritan Bennett™ 560 is a versatile and essential tool for patient respiratory support. Its dimensions of 23.5 cm W x 31.5 cm D x 15.4 cm H, combined with a robust power supply and USB compatibility, make it an exceptional choice for both patients and healthcare providers.

MAQUET SERVO-I UNIVERSAL VENTILATOR

The Maquet SERVO i ventilation system can be used on a variety of patients from neonatal, pediatric, to adults. It has the ability to handle the most acute phases of respiratory distress, through recovery, and to the waning phases of the ventilation process. The SERVO-i continuously delivers outstanding ventilator treatment as gently as possible. This is in part to performance, monitoring capabilities, treatment options, and tools that this ventilator offers. Since this ventilator can be used on a wide variety of patients, it is suitable for most environments from the ICU to the NICU department. The Maquet SERVO-i ventilator allows you to choose the treatment option based on your patients' needs without having to worry about the ventilator's capabilities.

ALLIED HEALTHCARE AHP300 VENTILATOR

The AHP300 is a new broad-featured transport ventilator designed to meet the specific needs of modern EMS response. It features the broad set of ventilation modes of critical care ventilators and a single panel user interface that is easy to use, easy to clean rugged and visible even in bright light conditions. It has quick start programmable presets which let the institution pre-program up to five ventilation protocols into memory and recall them instantly with the press of separate rapid recall buttons. This feature allows the responder to typically begin ventilating a patient with their desired protocol in less than 30 seconds. It also features innovative ventilation characteristics like Dynamic Flow Optimization and Seamless Mode Transition.
