WARMING CABINETS

Auxo Medical refurbishes and distributes warming cabinets to fit all medical practice or laboratory needs. With a focus on consistent, accurate, and efficient heating systems, Auxo Medical’s inventory of medical warming cabinets is ready to serve your facility.

Designed to store and heat sterile intravenous fluids, surgical irrigation fluids, linens, blankets, and more. Auxo Medical’s selection of warming cabinets come from the most respected brands in the industry. Additionally, with features like open shelf designs, LED readouts, and over temperature alarms. Ultimately, our warming cabinets offer superior durability and quality. Some of our medical warming cabinet units also offer adjustable shelves for optimal storage of your rotating inventory. Also, we carry non-heated storage compartments for any other essential equipment.

Our catalog consists of brand new, reconditioned and refurbished equipment. Would you like to filter the equipment by:

REFURBISHED

ENTHERMICS EC230L FLUID WARMER

The **Fully Refurbished Enthermics EC230L Fluid Warmer** is a reliable and efficient countertop device designed to keep IV fluids warmed, supporting patient recovery and reducing surgical site infection risks. Capable of holding up to 11 one-liter bottles or 16 one-liter bags, it provides consistent warming in a compact footprint measuring 20.7 inches high, 16.2 inches wide, and 28 inches deep. Constructed with heavy-duty, durable cabinets built for long-term use, the warmer features locked handles for tamper-proof security and an insulated glass door that allows staff to quickly assess fluid levels at a glance. Its stackable design enables multiple units to be easily combined, making it an ideal solution for busy medical environments seeking dependable, straightforward fluid warming.

STERIS DJ02 DUAL COMPARTMENT BLANKET WARMER

The **Steris DJ02 Dual Compartment Blanket Warmer** is a fully remanufactured and biomedically inspected unit designed for reliable warming of blankets and IV fluids in clinical settings. It features two independent compartments, each with adjustable digital temperature controls—allowing precise regulation of warmers for both IV and blanket modes. The upper compartment measures 23.5" W x 18" D x 13" H, and the lower compartment is the same width and depth but taller at 38" high, providing ample space for patient warming needs. The overall unit dimensions are 30" W x 22" D x 75.5" H, housed in stainless steel for durability and easy cleaning. Key features include a new circulation fan for improved airflow, overheat indicators, and contemporary design. Temperature ranges are set to 90-110°F for IV mode and 90-160°F for blanket mode—regulating safety and effectiveness. Powered by 120V, 50/60Hz, 1-phase power, it draws 14 amps (1680 watts), making it suitable for standard clinical power supplies.

STERIS DUAL COMPARTMENT BLANKET WARMER DJ06

The **Steris Dual Compartment Blanket Warmer DJ06** is a versatile and robust solution for healthcare facilities, offering a substantial 15.8 cubic feet capacity to accommodate a variety of warming needs. Its LED readout provides instant temperature confirmation, ensuring that the internal environment is consistently monitored for optimal performance. Constructed with superior durable materials, this blanket warmer is designed to withstand years of rigorous use. Adjustable shelving allows for flexible organization and storage, making it easy to adapt to varying inventory demands. The unit's reliable heating system ensures uniform and efficient heat transfer, crucial for maintaining the quality of warmed items. Options for visual access to inventory include dual-pane tempered glass or traditional solid steel doors, catering to different preferences and security needs. Designed to meet AORN Recommended Practices for a Safe Environment of Care, the DJ06 incorporates technology to warm IV fluids, aligning with RP VIII.b.3 standards. For added security, a temperature lock-out feature provides consistency and control, while the ability to select Celsius or Fahrenheit enhances convenience and accuracy. This versatile unit can be installed as a free-standing or recessed fixture, offering flexibility in placement. With a 24" (610 mm) depth and options for steel or dual-paned tempered glass doors, the Steris DJ06 is a comprehensive and reliable choice for any medical facility.

STERIS ANALOG TABLETOP WARMER

The Steris Amsco M70 Series line of blanket warmers was one of the most popular lines ever manufactured. This series features a tabletop version with a rotary knob that controls temperature. The Amsco® M70® also features over-temperature alarms (visual and audible) and a heating indicator (visible). On full size models, the upper compartment of the Amsco® M70® is the same as the tabletop version, but with a separate lower cabinet that is larger in size than the upper. The lower cabinet of the full size model comes as either a non-heated storage compartment or a heated version, which would maintain a constant 120° F temperature for warming of blankets only.
