Medtronic Aquamantys System - Fully Refurbished

The Aquamantys System and bipolar sealers feature innovative Transcollation technology, a combination of radio frequency (RF) energy and saline that provides hemostatic sealing of soft tissue and bone during surgery. The innovative Aquamantys System uses patented Transcollation technology to provide hemostatic sealing of soft tissue and bone, reducing blood loss, transfusion rates and surgical time during spine surgery.

Features:

- Decreases blood loss per level fused
- Decreases transfusion rates
- Prevents and stops epidural bleeding near critical structures
- May help improve visibility in the surgical field
- Decreases surgical time
- Helps to maintain hemoglobin levels
- Reduces post-operative drainage
- Console Dimensions: 14 1/2" wide x 15" deep x 7" tall
- Power cord: 10 feet long
- Simultaneous RF power and saline delivery
- Power settings from 20–200 watts
- Automatic settings for saline flow rate based on power setting
- Ability to select three different flow rate settings
- Convenient priming mode

Why purchase Auxo Medical Reconditioned Biomedical Equipment?

Auxo thoroughly inspects and re-certifies all of its reconditioned biomedical equipment. Batteries are checked or replaced, and each unit is cosmetically repaired. Calibrations are made and all safety inspections will be completed. In most cases our equipment warranties meets or exceeds those of the OEM.
