

Dual Bay Flexematic Scrubsink, IR- Fully Refurbished

Designed in accordance with Underwriters Laboratories safety standards, AMSCO Flexmatic Scrub Sinks fulfill the requirements of any operating room. The Steris Amsco Flexmatic surgical scrub station/sink is the right answer to your pre-operative surgical scrubbing of hands and arms. The design of the Flexmatic sink reduces splashing on the user and the shape of the bottom of the sink is designed to push the contaminants towards the drain. Safety features minimize contamination risk, and design options and accessories provide convenience to your staff.

Features:

- Stainless steel construction with welded compartments and coved corners for easy cleaning
- Hands-free water control: knee activated panel turns water on and off
- Optional hands-free soap: 2 cc. of soap are released with each push of the foot pump or knee panel operated accessory
- Standard rose spray faucet: producing a showerhead type pattern without aerating the water
- Optimum water temperature: the built-in thermostatically controlled mixing valve provides water temperature up to 115° F (46° C)
- Chair carrier recommended to support the hanging weight of the scrub station if the wall is not properly reinforced
- Infrared sensor: easily turns water on and off when hands are under faucet
- Single Mixing Valve for each station
- Z-Rail and Wall Brackets
- Dimensions: 64 x 27-9/32 x 51-1/2"
- Elevation from Finished Floor: 12"
- Cold Water Input: 1/2" NPT, 25-50 PSIG
- Hot Water: 1/2" NPT, 120°-140°, 25-50 PSIG
- Drain Size: 1-1/2" Overall Diameter
- Electricity (if using optional infrared): 120V, 1 Amp

Why purchase Auxo Medical Reconditioned Biomedical Equipment?

Auxo thoroughly inspects and re-certifies all of its reconditioned biomedical equipment. Batteries are checked or replaced, and each unit is cosmetically repaired. Calibrations are made and all safety inspections will be completed. In most cases our equipment warranties meets or exceeds those of the OEM.
