Auxo Medical's Biomedical Equipment Refurbishment and Quality Assurance Process

Our meticulous refurbishment process is designed to restore each piece of biomedical equipment to its original factory specifications, guaranteeing optimal performance and peace of mind for healthcare professionals.

1

Initial Evaluation and Processing:

- **Thorough Inspection:** Every incoming piece of equipment undergoes a comprehensive inspection to identify any initial defects or damage. This includes a visual assessment, functional testing, and a review of the device's available history and documentation.

2

Manufacturer-Approved Maintenance and Evaluation:

- **Following OEM Procedures:** Our technicians follow the manufacturer's preventative maintenance procedures to ensure a thorough evaluation of all components and features.
- **Component Assessment:** Each component of the device is carefully examined for signs of wear or malfunction. This ensures that every part meets the manufacturer's specifications.

3

Component Replacement and Repair:

- **Replacing Defective Components:** Any defective or worn-out components are replaced, ensuring the highest level of compatibility and reliability.
- **Expert Repairs:** Our team of biomedical technicians is skilled in repairing complex electronic systems, ensuring that any necessary repairs are performed to the highest standards.

4

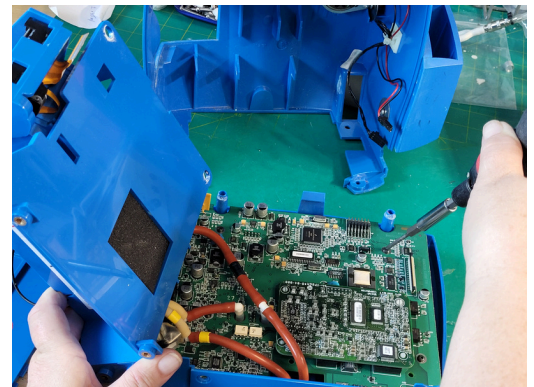

Cosmetic Refinishing:

- **Restoring Aesthetics:** Each device undergoes a cosmetic refinishing process to restore its appearance to a 90%-95% like-new condition. This includes a thorough cleaning, polishing, repairing or replacing damaged exterior casings or components, repainting the exterior, and replacing any necessary decals ensuring a professional and aesthetically pleasing presentation.

5

Final Testing and Quality Assurance:

- **Rigorous Testing:** The refurbished device undergoes a final round of testing to ensure that all functionalities are restored to factory specifications. This includes testing relevant parameters of the device which may include alarms, visual displays, recording capabilities and general functionality.
- **Internal Documentation:** Auxo Medical maintains detailed internal documentation for each refurbished piece of biomedical equipment, providing a comprehensive record of the PM procedures performed as well as QA report. This documentation is available upon request, offering transparency and peace of mind.

Enjoy peace of mind knowing that your refurbished biomedical equipment is covered by up to a

1 YEAR AUXO MEDICAL WARRANTY!
